

THE ASTURA AND NETTUNO SURVEYS OF THE PONTINE REGION PROJECT (2003 – 2005),
2ND AND FINAL REPORT

P.A.J. ATTEMA, T.C.A. DE HAAS & G.W. TOL

University of Groningen, Groningen Institute of Archaeology, Groningen, the Netherlands

ABSTRACT: Between 2003 and 2005, a team from the Groningen Institute of Archaeology (GIA) of the University of Groningen conducted systematic field surveys in the lower Astura valley and in the surroundings of present-day Nettuno. Nettuno is located on the Tyrrhenian seaboard, approximately 50 km south of Rome (southern Lazio). The surveys are part of the GIA's Pontine Region Project (PRP), a landscape-archaeological project studying the long-term settlement and land-use patterns in the Pontine coastal plain and Lepine mountains. The Astura and Nettuno surveys have yielded valuable data on prehistoric to Roman presence in an area that currently is under high pressure of urbanization and agricultural land improvement; these are rapidly wiping out what still remains of a formerly rich archaeological record.

The field surveys consisted of systematic block surveys and revisits to sites that had been mapped previously by the Italian archaeologist F. Piccarreta and the director of the local museum, A. Liboni.

This report presents the results of both the block surveys and the revisits of 2004 and 2005, which concentrated on the areas of Campana and Quarto delle Cintonare. All sites and related artefacts are presented in the appendix (also published online)¹, while in the article we evaluate the most important results of the surveys for each period.

KEYWORDS: Central Italy, Pontine region, Pontine Region Project, Astura, Nettuno, archaeological survey, protohistoric settlement patterns and land use, Roman settlement patterns and land use, pottery studies.

1. INTRODUCTION

The aim of this report is to publish in full the archaeological sites that were recorded in the surveys of the Pontine Region Project (PRP) in the area of Nettuno during the campaigns of 2004 and 2005. These campaigns followed the surveys carried out along the banks of the river Astura during the summer of 2003 as reported in Attema *et al.* 2007/08, but now concentrated on an area closer to Nettuno. In combination, the areas in which the Nettuno and Astura surveys took place form a contiguous block of land of c. 215 km² (fig. 1). As in the Astura surveys, the Nettuno surveys comprised systematic, intensive survey of ploughed fields to map any archaeological surface remains, as well as revisits to already known sites. Together with the first report (Attema *et al.*, 2007/08), the site catalogue presented in this report offers a full inventory of sites as recorded during our surveys from 2003 to 2005. For each site and off-site context, diagnostic artefacts are presented in the catalogue. The site data of the Nettuno surveys published in this report were, in concise form, published together with the archaeological map of the Nettuno municipality and the artefact collection of the local museum (Attema *et al.*, 2009; Attema *et al.*, forthcoming a).

The report starts with an outline of the present-day landscape and land use, and past and present topography of the survey area (section 2). This is followed by a brief overview of previous (topographical) studies dealing with the area and an introduction of the methodology used during our studies, as well as some comments on site-loss in the area (section 3). In section 4 we present a period-

by-period evaluation of the ceramic sites and comment on on-site and off-site materials, for each period discussing a specific site or area in greater detail. Section 5 summarizes the results of the Astura and Nettuno field campaigns taken together, and briefly refers to further work on the data set that is currently under way.

2. LANDSCAPE AND TOPOGRAPHY

2.1. Landscape, land use and present-day topography of the survey area

The study area centres on the municipality of Nettuno. In topographic terms it is bounded to the west by the modern Strada Statale Nettunense and, to the east, by the Moscarello river, while to the north it stretches from the modern village of Castelverde to the areas of Quarto delle Cintonare and Campana. To the south the area is delimited by the Tyrrhenian Sea.

The landscape of this coastal area was discussed in detail in the first report (Attema *et al.*, 2007/08: 147 and fig 2a); here we only summarize its most important features. The area forms part of a system of sandy-clayey marine terraces covered by sands during the dry period of the last Ice Age. Several rivers cut through these ancient terraces, most importantly the Astura river, but secondary streams such as the Loricina and Moscarello are also important elements in the landscape. Their valleys consist of alluvial and colluvial-alluvial sediments, but in the upper stream valleys of the Astura and the Loricina, tuff banks have also been exposed.

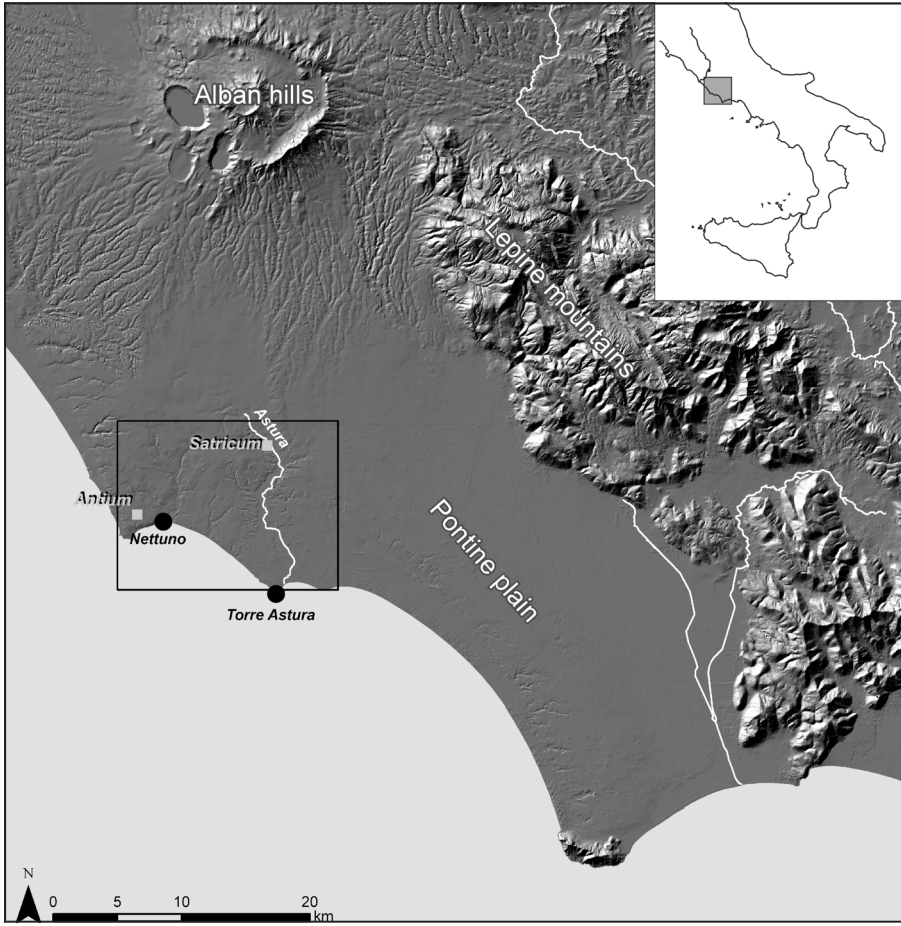

Fig. 1. Location of the fieldwork area (Drawing T.C.A. de Haas, RUG/GIA).

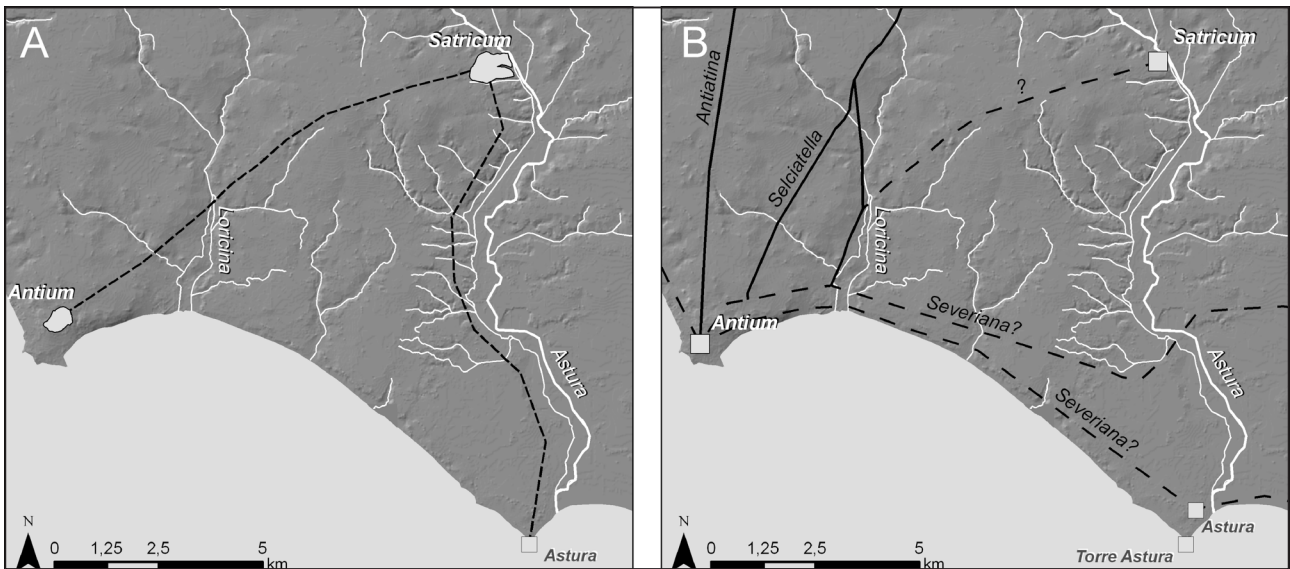

Fig. 2. Protohistoric (A) and Roman (B) towns and infrastructure (Drawing T.C.A. de Haas, RUG/GIA).

Land use in the area is quite varied. To the south-west, large areas are taken up by the town of Nettuno and its ‘suburbs’, while further east the coastal strip is occupied by a military base. Inland there are both for-

ests and agricultural zones; within the latter, fruits and vegetables (melons, tomatoes) as well as cereals and vines are grown.

Land use thus restricts the potential for intensive systematic surveying to the agricultural zones, and within this zone our surveys have concentrated on two areas: to the west, the area of Campana and, to the east, the area of Quarto delle Cinfonare. In these areas, relatively large and continuous stretches were under cultivation, and visibility conditions were fairly favourable (fig. 3).

2.2. Past topography of the survey area (ancient road network, bridges, aqueducts)

Two Late Iron Age/Archaic proto-urban centres are located just outside our study area, *Antium* and *Satricum*.² The development of both of them must have been closely tied to their favourable location. Protohistoric *Antium* was located on a tuff hill called *Le Vignacce*, just 1 km north of the natural promontory of *Capo d'Anzio*. Ancient *Satricum* lies on a tuff plateau beside the river Astura, which provides direct access to the sea. Communication routes over land too must have existed in protohistoric times. Fragments of a road dating from the Late Iron Age were excavated within the town of *Satricum* (Maaskant-Kleibrink, 1992: 15; Gnade, 2002: 8). Although no archaeological evidence for an early road system is attested in our study area, it is fair to assume that roads existed between the settlements of *Satricum* and *Antium* as well as between *Satricum* and the hypothetical settlement of *Astura*, located near the mouth of the Astura river (Maaskant-Kleibrink, 1987: 12; see fig. 2a).

In the 5th and 4th centuries, a colony was founded twice at *Antium*, the first in 467 BC and the second in 338 BC. The establishment of a colony at *Satricum* is ascribed to the year 385, but archaeological evidence shows that by this time the city had lost its central function, although its sanctuary remained in use until at least the 2nd century BC.

Many building activities in and around the city of *Antium* date to the Late Republican and Early Imperial periods. These must mainly be considered as investments by the elite, with an important role historically attributed to the Imperial court. The emperors Caligula and Nero were supposedly born in *Antium* and the latter is thought to have founded a veteran colony here and to have financed the construction of the harbour.

Also in the wider study area, infrastructural improvements can be attributed to these periods (fig. 2b). The track of a paved road runs through the *Campana* area, forking off the *via Appia* towards the promontory of *Antium*. The name of this road is not known from ancient sources and it is now simply referred to as the *via Selciatella* (De Rossi, 1981; Negrini, 2004). Within the Nettuno municipality a byway branched off the *Selciatella*. This byway headed due south towards the mouth of the Loricina stream, where it presumably joined a coastal road. Although the paving of these roads is dated to the Late Republican or Early Imperial period, these tracks were probably in use in earlier times

(see also section 4, below). Two bridges are associated with these tracks. The first, on the main road, crosses the *Fosso Armellino* (site 15015) and the second, discovered in line with the byway, crosses the *Fosso del Quinto* (site 15129).

Although a coastal road known as the *via Severiana* is thought to have passed through the district, the archaeological evidence for its exact route is still lacking. Two different courses are suggested for this coastal road, one directly along the coast and a second more inland, avoiding the waterlogged area around the coastal lagoons south of our study area (Brandizzi Vittucci, 1998; Cassatella, 2004). The remains of a Roman bridge crossing the Foglino stream can perhaps be associated with a coastal route (Piccarreta, 1977: 85). Finally, it is uncertain whether a track between *Satricum* and *Antium* survived into this period. In the westernmost part of our study area, right on the border with *Antium*, the remains of an aqueduct were found (Brandizzi Vittucci, 2000: 78). A second aqueduct was identified northwest of the city, running from the area of Aqua del Turco towards *Capo d'Anzio* (Lugli, 1940: 176/177).

The Late Republican and the Early Imperial period also saw the construction of large *villae maritimae*, both around *Antium* and north of the mouth of the Astura river. The largest of these complexes are the *villa* of Nero near *Antium* and the *villa* at Torre Astura. The latter was erected on an artificial island connected to the mainland by a bridge-cum-aqueduct, with extensive fishponds and a harbour (Piccarreta, 1977).

3. BACKGROUND AND METHODOLOGY OF THE NETTUNO 2004 AND 2005 SURVEYS

3.1. Previous studies

The study area has been subject to a range of archaeological studies; some of these were already discussed in the first report, and we here provide a shorter but more complete review. Previous studies include both topographic research and excavations; the former deal with the countryside as well as the sites of *Antium* and *Satricum*, whereas the latter focus almost exclusively on these two towns.³

Topographic studies go back to the 18th century; works by famous scholars such as Volpi, Nibby and – in the late 19th and early 20th century – Lanciani and Ashby include descriptions of the monumental remains of *Antium* (see also Brandizzi Vittucci, 2000). Lugli's study in the early 1940s is the first that systematically describes the remains of this protohistoric settlement and the Roman port, including the Imperial villa complex (Lugli, 1940).⁴

From the 1970s onwards, interest also shifted towards the countryside. Several studies focused on the site of Torre Astura (Castagnoli, 1963; Piccarreta, 1977; 1980). De Rossi (1981) described a number of rural sites relating

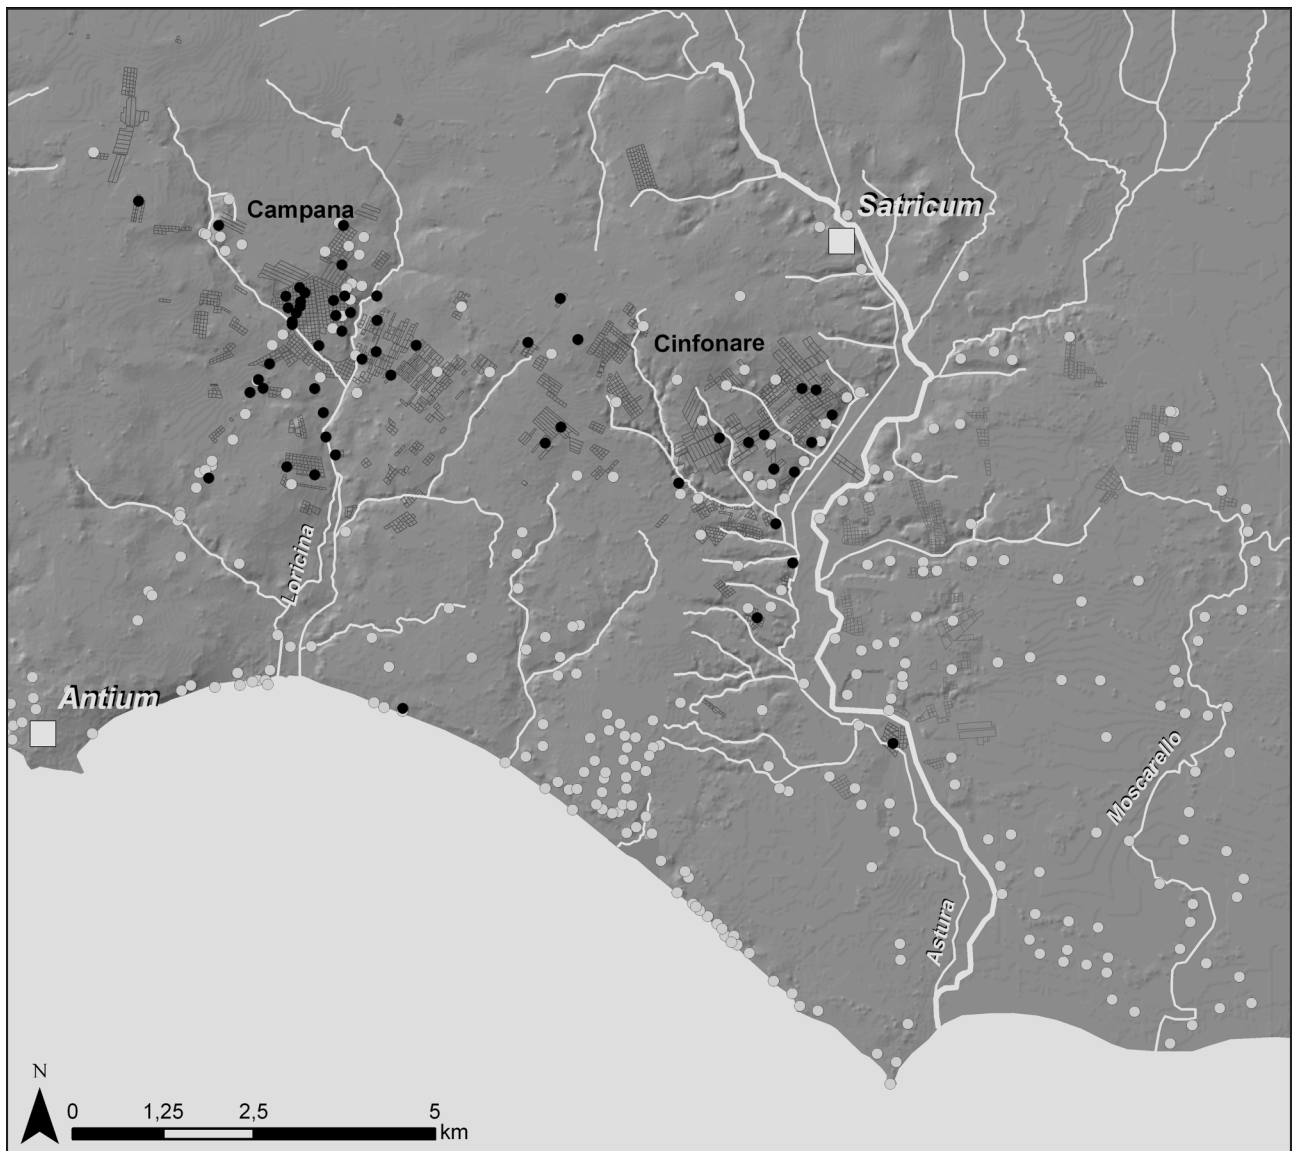

Fig. 3. Survey area and sites of the 2004/2005 surveys. Black dots: new and revisited sites; small grey dots: sites that have not been revisited. Grey blocks were surveyed in 2003. (Drawing T.C.A. de Haas, RUG/GIA)

to the Roman road system, while more recently studies have focused on two specific Roman roads in the area, the *via Selciatella* and the *via Severiana* (Brandizzi Vittucci, 1998; Cassatella, 2004; Negrini, 2004).

Two topographic studies are of special importance to our work, as they form the basic inventory of rural sites in the study area. The first of these is Piccarreta's study of the lower Astura and Moscarello valleys (Piccarreta, 1977). In this area of approximately 10 x 10 km, Piccarreta mapped 196 sites, predominantly of Roman date (*cf. Attema et al.*, 2007/08: 427). His study, although providing limited chronological information, describes many sites that have now been built over or have disappeared as a result of ploughing and levelling. Moreover, he was able to enter the military base, which nowadays is inaccessible.

The second important topographic study was done by A. Liboni, the director of the Antiquarium of Nettuno. He mapped around 85 sites, some of which have disappeared since their discovery as a result of intensive agriculture and urbanization. From many of these sites Liboni also collected pottery samples, which, although biased towards Roman fine wares, give us more refined dating evidence than we have for many of the sites mapped by Piccarreta. None of these data were published so far.

3.2. Survey methodology and some comments on site loss

The survey methods used in 2004 and 2005 are similar to those of 2003 as reported in Attema *et al.*, 2007/08: 427–429. Revisits to 'Piccarreta sites' continued, while

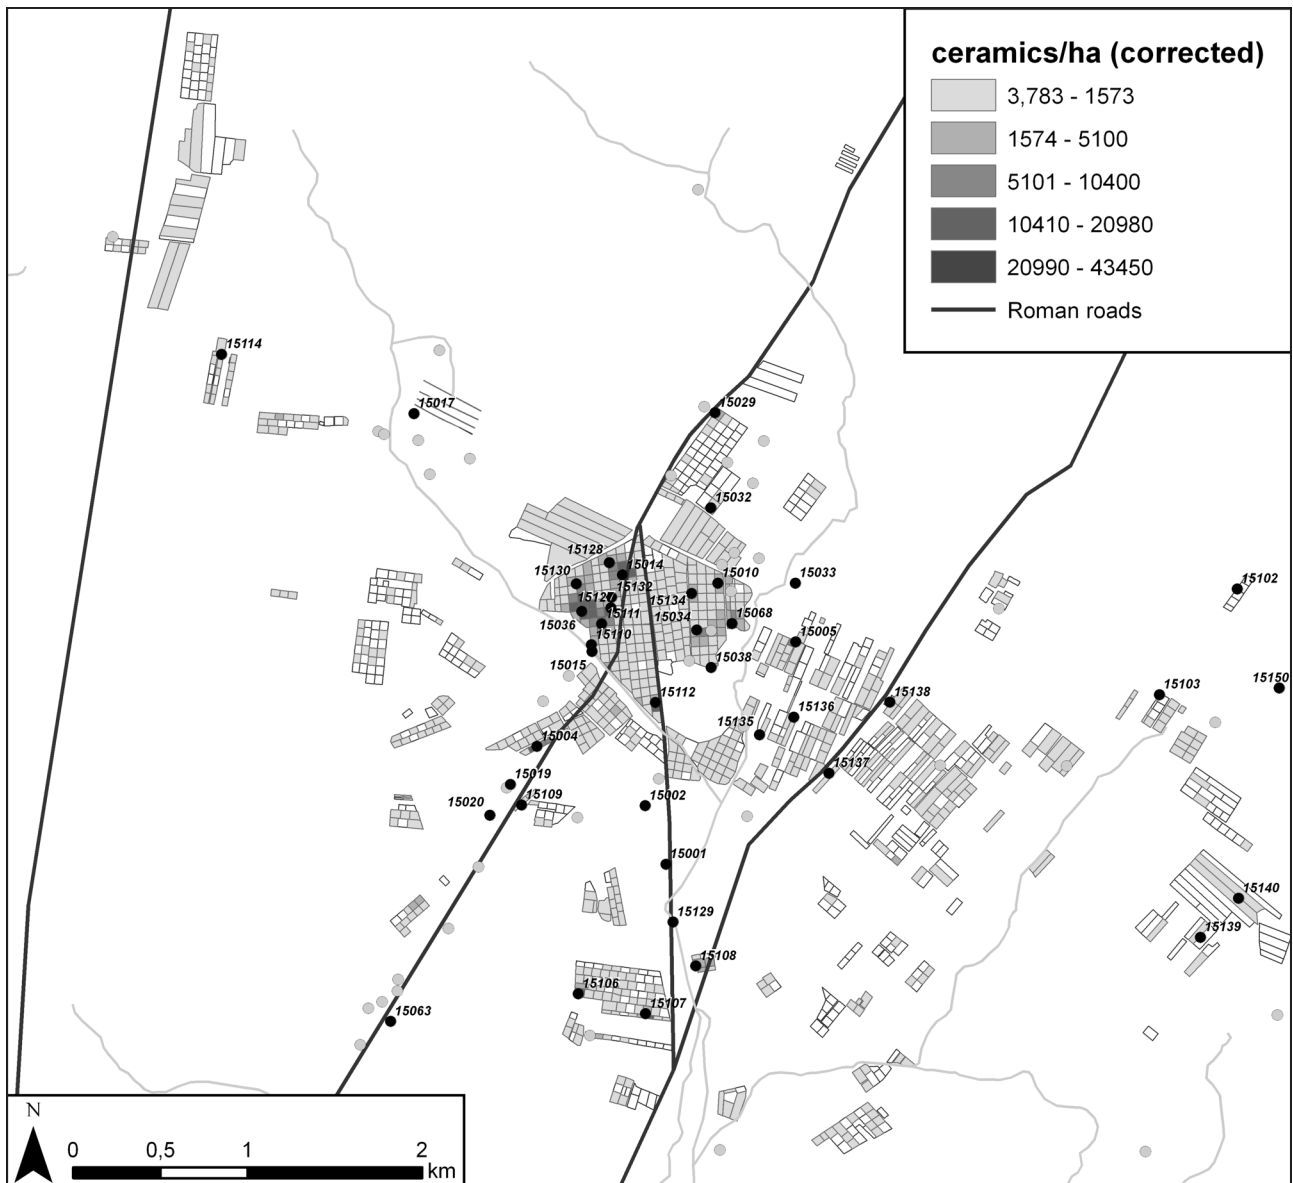

Fig. 4. Block surveys in the Campana area and surroundings (Drawing T.C.A. de Haas, RUG/GIA).

'Liboni sites' were also included in the revisit programme (fig. 3). The block surveys concentrated on the areas of Campana and Quarto delle Cintonare, covering 617 ha in all (figs 4 and 5).

The revisits to the Liboni sites allow us to add observations on site loss in the area (for a comment on site loss from the Piccarreta dataset, see Attema *et al.*, 2007/08: 429). In Liboni's inventory, 68 sites are listed within the municipality of Nettuno.⁵ Of these, 27 sites were located either in the present-day centre of the city or on the *Poligono Militare*, which now rendered them inaccessible. The other 41 sites are located in still more or less 'open' areas. In the summer of 2004, a team set out to confirm their location and to establish a more precise chronology by collecting additional (diagnostic) samples. A little over 30% of these 41 sites were found to have been destroyed completely, in most cases through

building activities. On another 30%, visibility conditions proved adverse. In some cases one or a handful of artefacts were collected, in other cases no materials were found. However, we cannot exclude the possibility that these sites will be more visible under better conditions. On three further occasions landowners did not grant us permission to enter their fields, and hence we were unable to verify the survival of these sites. One site was visited under good visibility conditions, but no material was observed. The most probable explanations are that either the site had been ploughed out or that its appearance on the surface varies from ploughing episode to ploughing episode (*cf.* Lloyd & Barker, 1981: 291).

The remaining 13 sites were successfully located, although not all of them produced good data. We must however note that, in comparison with the revisited sites in the Astura valley, a larger share of the sites yielded

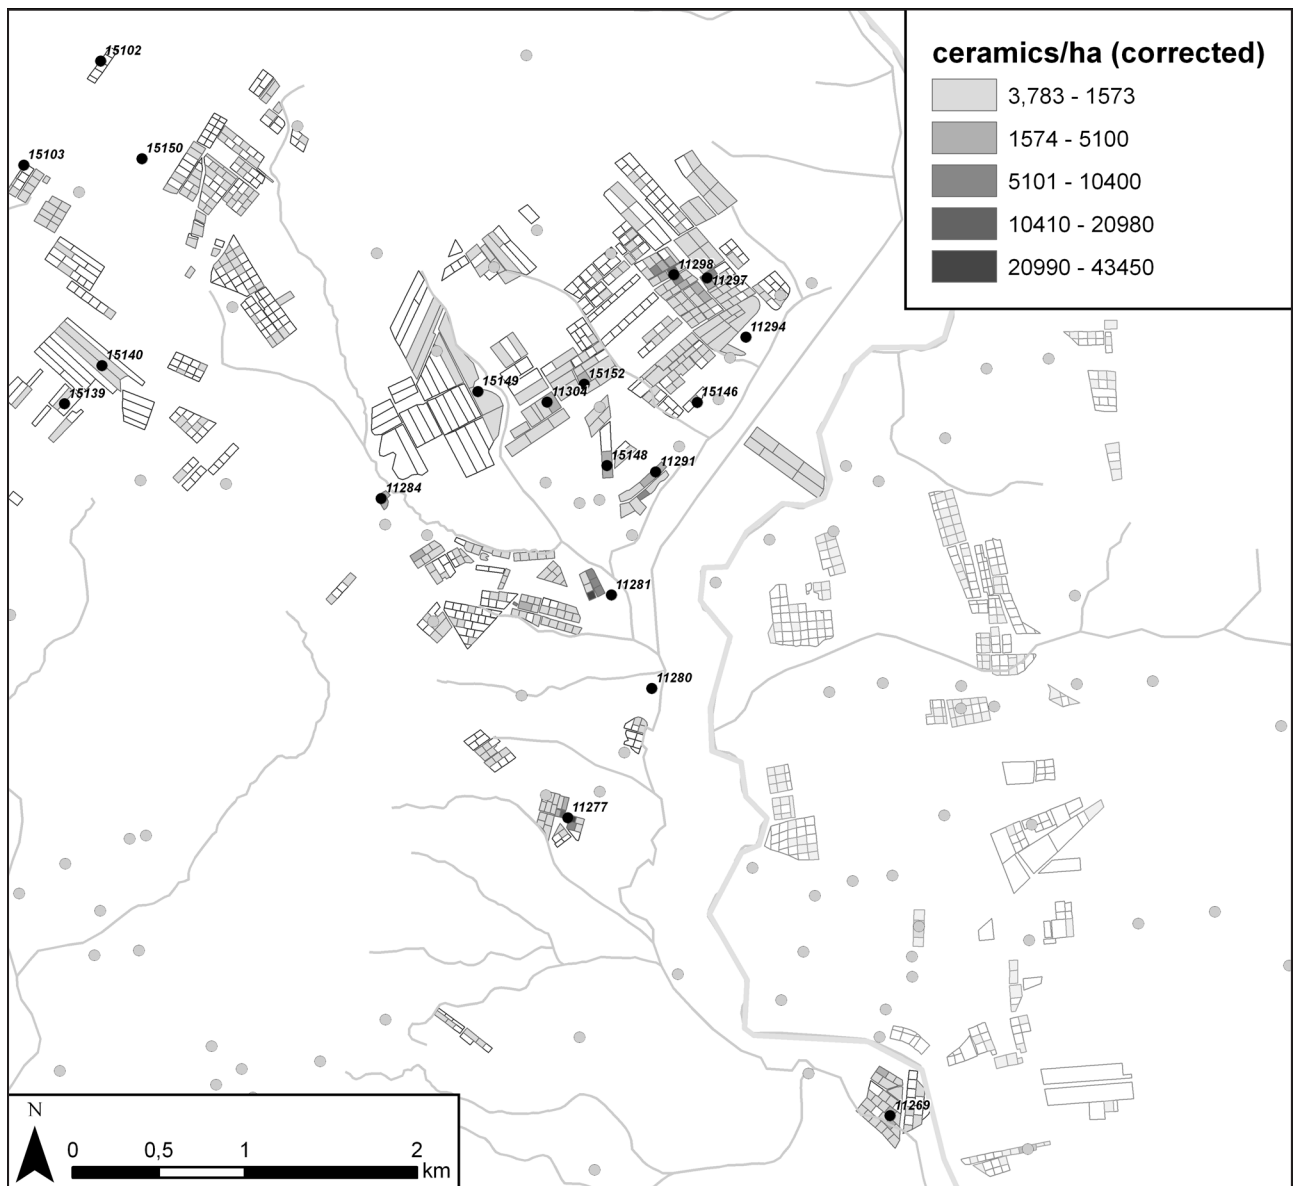

Fig. 5. Block surveys in the Cinfonare area and surroundings (Drawing T.C.A. de Haas, RUG/GIA).

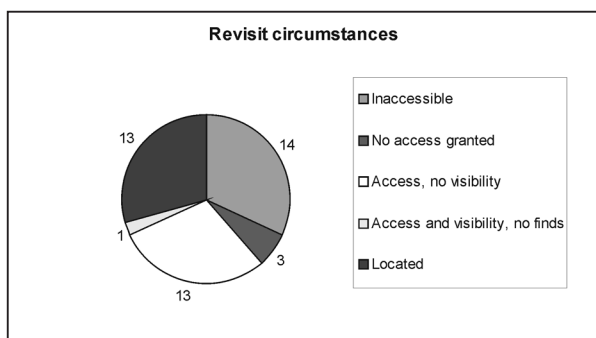

Fig. 6. Revisit circumstances on Liboni sites in the Nettuno municipality (Drawing T.C.A. de Haas, RUG/GIA).

samples of more than 10 sherds, and the quality of the artefacts is in general much higher.

Summarizing, the proportion of Liboni sites ‘lost’ over the last 40 years lies between 35% and 70% (see fig. 6). These figures are more or less similar to those for the Astura survey, although the causes are different. In the Nettuno area most sites were destroyed by construction works; in the Astura valley, interventions for agricultural purposes appear to be the main cause of site loss. Despite this large percentage of site loss, the revisits must be considered worthwhile. Not only did they improve our understanding of the degradation of the archaeological record in the study area, but when sites were located the new samples added to our knowledge of their chronology.

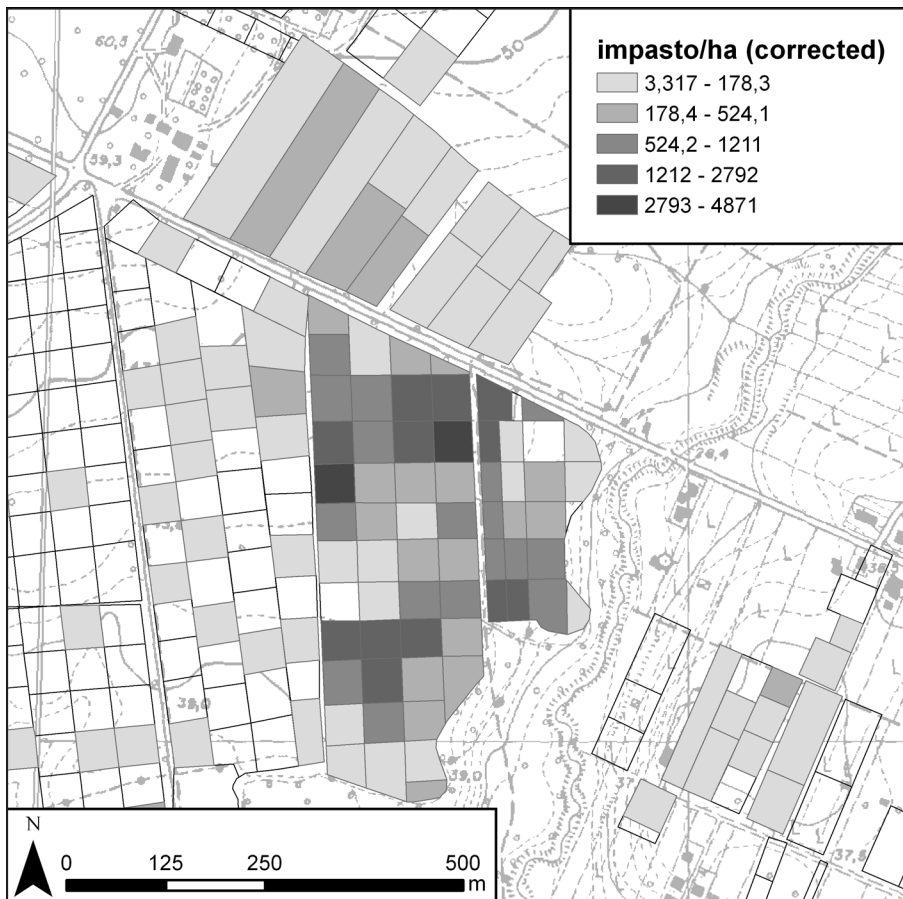

Fig. 7. Distribution of impasto pottery in the Campana area (Drawing T.C.A. de Haas, RUG/GIA).

4. EVALUATION OF THE RESULTS FROM THE BRONZE AGE TO THE ROMAN PERIOD

Here, as in the first report, we present a discussion of the survey results for protohistorical and Roman periods. We discuss four periods for which we have additional data: the Bronze Age, the Orientalising/Archaic period, the post-Archaic/Republican period, and the Imperial period.⁶

Bronze Age

Sherds of protohistoric hand-made pottery (*impasto*) occur in low numbers over the entire survey area and are frequently found on sites of later date (Archaic and Roman). Most of these are small, worn and without diagnostic features as a result of ploughing in combination with the friable nature of the *impasto*. As a consequence, only broad date ranges can be assigned to the *impasto* found in the survey.

The eastern part of the Campana area stands out for its relatively high densities of *impasto* over a large area. It is located c. 6 km northeast of Anzio in an elevated, not naturally defensible position in the fork of two streams, with a clear and unimpeded view towards the sea. In this area (see fig. 7) we discern four concentrations of *impasto* sherds.⁷ The two concentrations to the south correspond to Roman sites (15068 and 15034 discussed below). The concentrations in the upper left and right-hand corner of

figure 7 were initially dated to the Iron Age. However, diagnostic materials from this area in the museum collection date to the first, second, and possibly the third phase of the Middle Bronze Age (Alessandri, 2009: 235–240). These not only came from the four concentrations, but from a wider area that continues north of site 15010; on the basis of this distribution, Alessandri hypothesizes a Middle Bronze Age settlement of around 6 ha (Alessandri, 2009: 584). This would imply that at least part of the *impasto* sherds collected in the survey are contemporary with the diagnostic fragments, and thus belong to the Middle Bronze Age as well. The distribution of the *impasto* in combination with the diagnostic sherds indicates that the four locations were occupied at some point during the first part of the Middle Bronze Age, but not necessarily at the same time (see Alessandri, 2009: 389, table 14a).⁸

Compared to other parts of the Pontine Region, the coastal area has relatively many Bronze Age sites. Bronze Age subsistence is thought to have been based still partly on fishing, hunting and gathering and this may also be the case at Campana, as the sandy soils in the area are not particularly fit for arable farming.

Orientalising/Archaic

Compared to the Bronze Age pottery, there are more Orientalising and Archaic diagnostic wares (*impasto ros-*

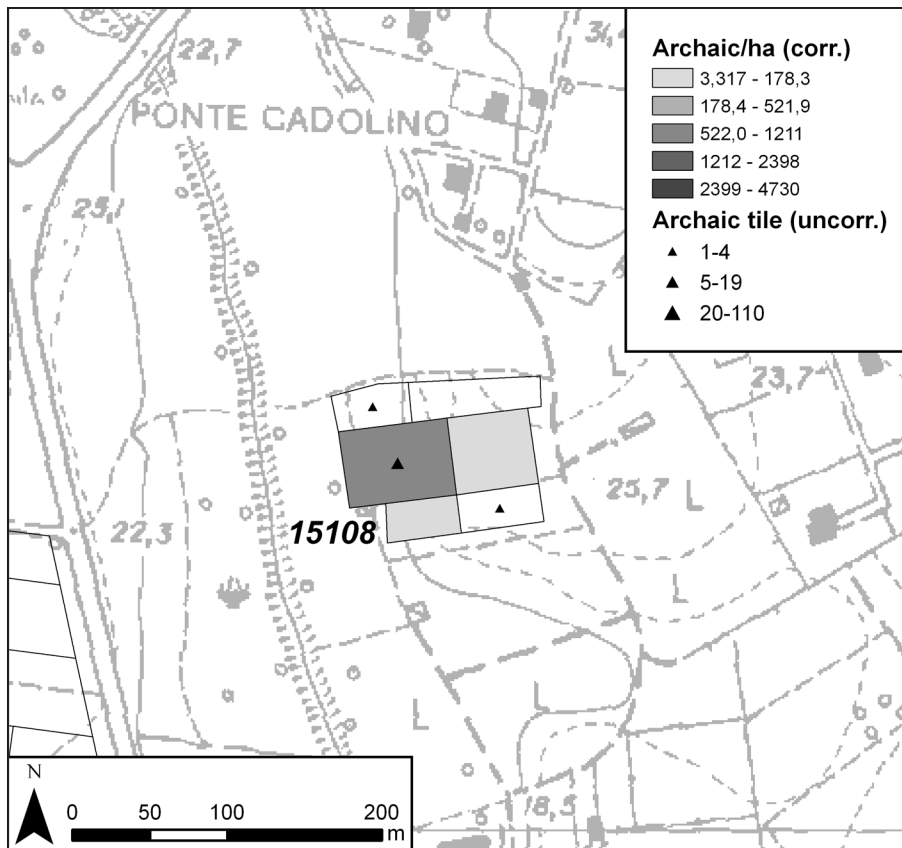

Fig. 8. Density of possibly Archaic ceramics and tile on site 15108 (Drawing T.C.A. de Haas, RUG/GIA).

so, *bucchero*, and Etrusco-Corinthian pottery). However, in surface contexts these are only found in very small amounts, and on few sites (cf. Attema *et al.*, 2009: 57–60 and fig. 6.1). Additional but less secure evidence for Archaic occupation comes from a specific red augite fabric that was used for both pottery and *tegula*. Such *tegulae* may be an indicator for Archaic activity, although the pottery of this fabric (and with its typical shapes) continues well into the post-Archaic and Republican period.

As in the Astura valley, this fabric is found on many (Roman) sites surveyed in 2004 and 2005. The – afore mentioned – wares and red augite *tegulae* occur at just eleven sites, whereas almost all sites have red augite pottery. Although this pottery in theory may be considered coeval with the later Republican materials, it may thus in fact represent a preceding Archaic phase.

As an example of a definitely Archaic site, we here present the case of site 15108 (fig. 8). This site consists of a modest concentration (probably measuring less than 0.25 ha) of *tegula* and pottery, including a *bucchero* fragment, a typical Archaic *dolium* rim with four grooves on top of the lip (Attema *et al.*, 2001/2002: type II.8) and Archaic *tegula*. The site is located on the edge of a ridge overlooking the *Fosso Loricina* and probably accommodated a farm; although excavated examples of such sites are few, we might envisage a simple structure similar to that uncovered at Podere Tartuchino (Perkins & Attolini, 1992).

During the 2003 surveys in the Astura valley, similar small sites were observed, as well as one larger Archaic site (cf. Attema *et al.*, 2007/08: 432/433) which was interpreted as a clustered settlement, perhaps a hamlet.⁹ In general, such Archaic sites represent a phase of rural expansion in the territories of *Antium* and (for the Astura valley and the Quarto delle Cintonare area) *Satricum*. Considering the size and prosperity of these towns in the Archaic period, it is plausible that their surroundings in this period were dotted with small farms. In this light, most sites with only red augite fabric pottery may indeed represent such Archaic farms.

Post-Archaic/Republican

The problems relating to the evidence for post-Archaic settlement were already discussed in the first report; the ceramic assemblage of the 2004/2005 surveys shows a similar lack of diagnostic types, while pottery fabrics (white and pale augite fabrics, the so-called *impasto chiaro sabbioso*) typical for these times continue into the Republican period. Apparently the most important indicator of post-Archaic occupation is the presence of *tegula* fragments of a yellow or white augite fabric with large amounts of augite¹⁰; a reexamination of the *tegula* fragments from all block surveys (including 2003) showed that such fabrics occur at seventeen sites. Significantly, thirteen of these are located in the Astura valley (including Quarto delle Cintonare) while in the Campana area

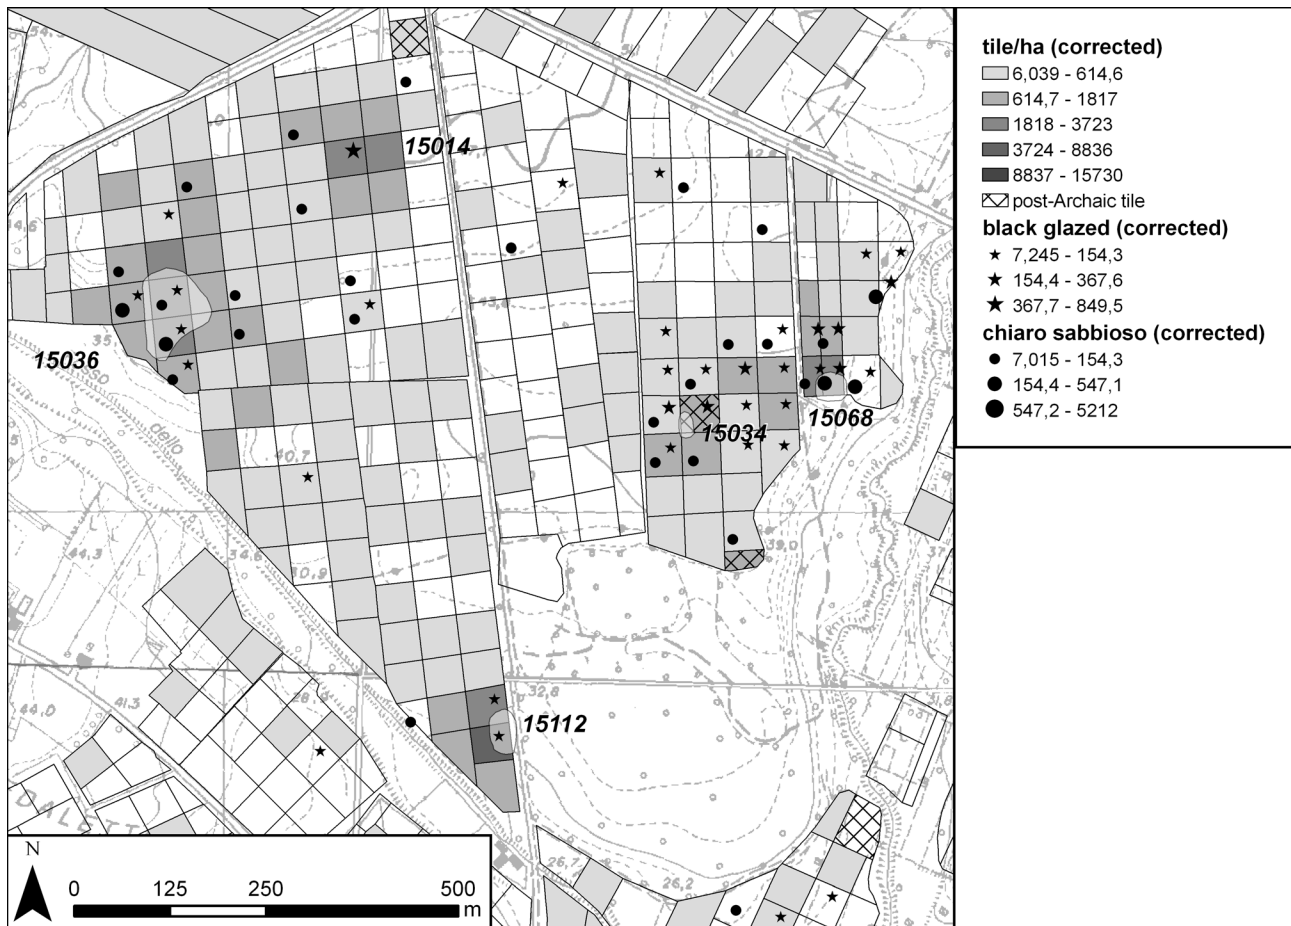

Fig. 9. Distribution of post-Archaic and Republican tile and pottery in the Campana area (Drawing T.C.A. de Haas, RUG/GIA).

and other parts of the survey area (in general, on the marine terraces), such fabrics occur at only four sites.

The contrast between Campana and Quarto delle Cintonare is illustrated in figs 9 and 10 (*cf.* also De Haas, 2008: fig. 5). The post-Archaic *tegulae* fabrics occur in many survey units (indicated hatches) and on almost all sites in the Cintonare area, whereas only few blocks and sites in Campana have such *tegulae*. As both *tegula* wasters in this fabric and kiln debris were observed on sites 11297 and 11298, it appears that these were produced in the Quarto delle Cintonare area.

In both areas, and in the study area as a whole, Republican occupation is widespread. The typical *tegulae*, black-glazed and coarse wares of this period occur in large numbers, both on sites and in off-site contexts. In the Campana area, we observe at least five concentrations in a relatively small area, securely dated to the Republican period. Although especially around sites 15034 and 15068 the spread of materials appears almost continuous on the density maps, during fieldwork these two appeared clearly separated. Both of these concentrations are comparable to site 15112 and the earliest phase of 15014, all smaller than c. 0.2 ha, a size that would be compatible with their interpretation as single farmsteads. Site 15036, located to the west, is significantly larger (c.

0.7 ha) and may represent a different type of settlement, perhaps a hamlet, or a protoform of a Roman villa.¹⁰ This site occupies a dominant location within the landscape, on a hilltop overlooking both the stream to the south and the other sites to the east and southeast.

The Imperial period

Imperial period remains in the survey area are highly visible, as there are a large number of easily recognizable wares (including *terra sigillata*, African red slip wares, well-known amphora types and fabrics and coarse wares) for this period. We observe clear spatial differentiation within the survey area, as well as differentiation in site typology (*cf.* also Attema *et al.*, 2009; forthcoming a).

Spatial differentiation appears to be related to the two main landscape units in the area, the Astura valley and the marine terraces. Both on the left bank (studied in the 2003 survey) and the right bank (the Quarto delle Cintonare area), there is a considerable reduction in occupation, which is especially clear after the 1st century AD. Almost all of the remaining sites are small, simple sites (probably farms). On the marine terraces, the reduction in numbers of sites is much less dramatic, while the rising number of large sites may indicate that settlement and exploitation of these areas actually intensified.

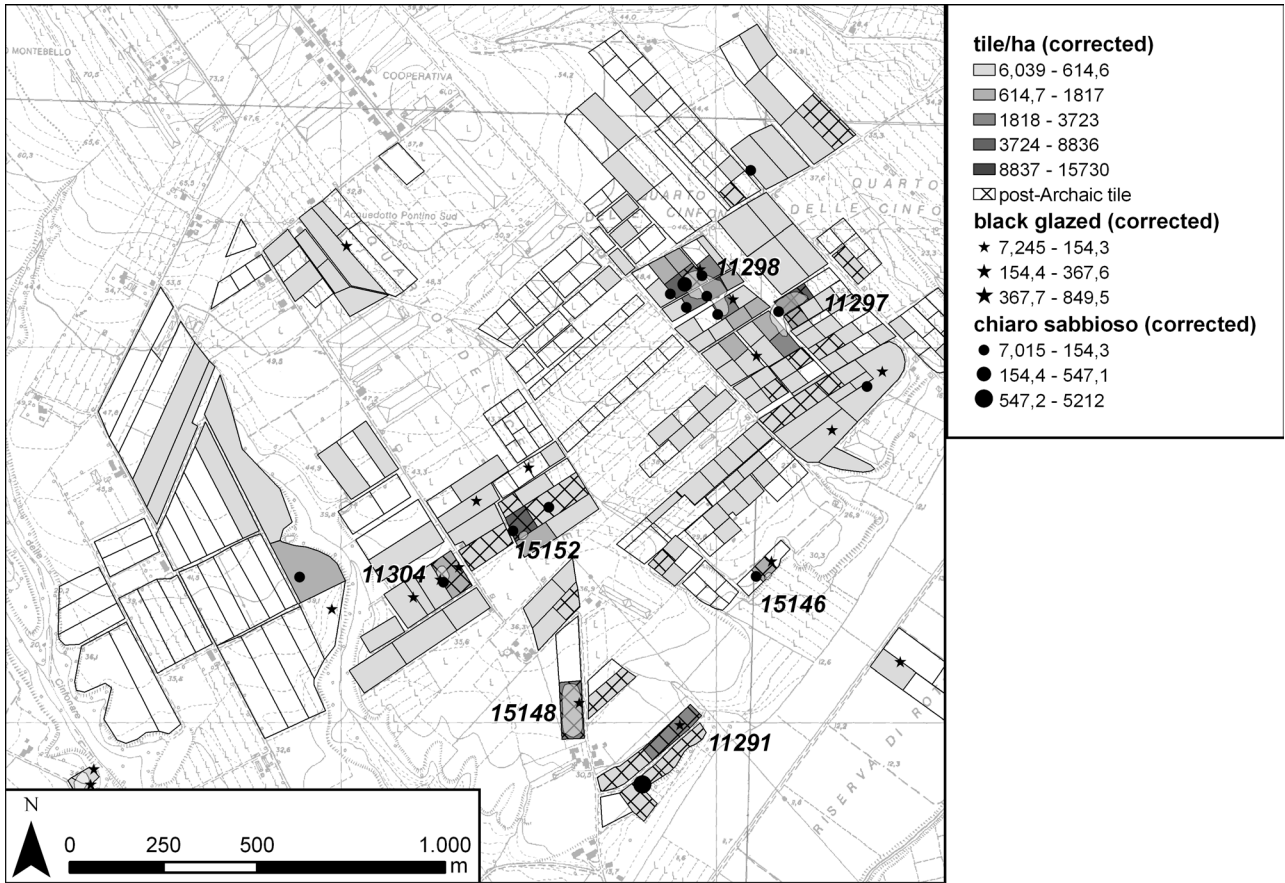

Fig. 10. Distribution of post-Archaic and Republican tile and pottery in the Cinfonare area (Drawing T.C.A. de Haas, RUG/GIA).

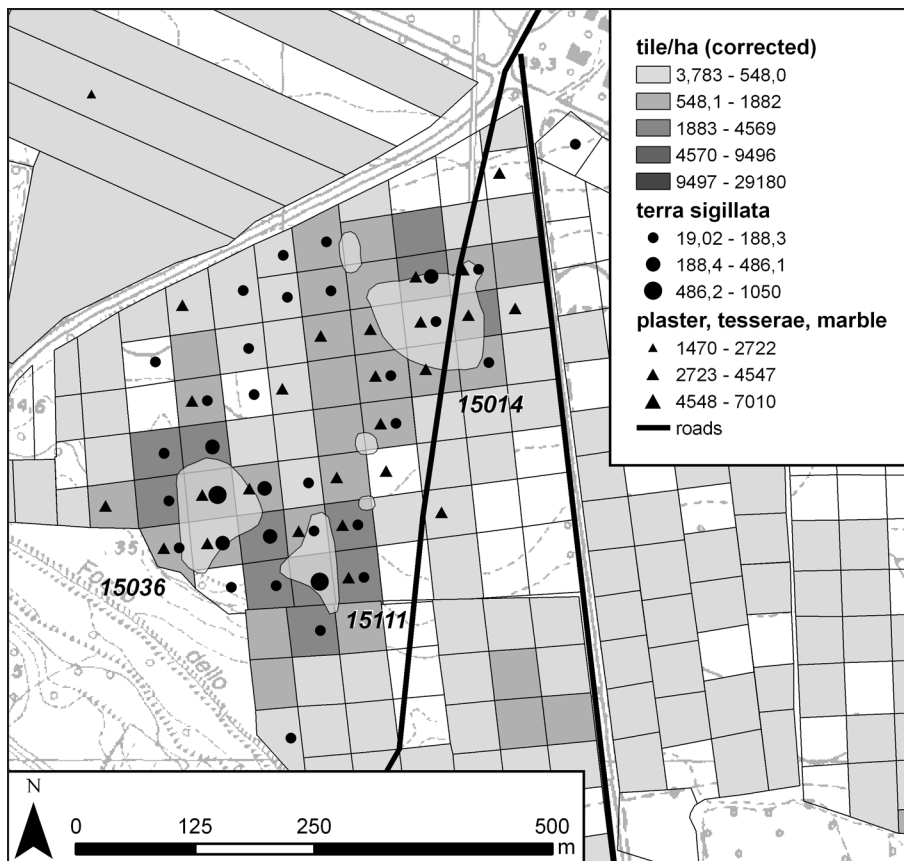

Fig. 11. Distribution of late Republican and Imperial tile, terra sigillata and 'luxury indicators' around three villas in the Campana area (Drawing T.C.A. de Haas, RUG/GIA).

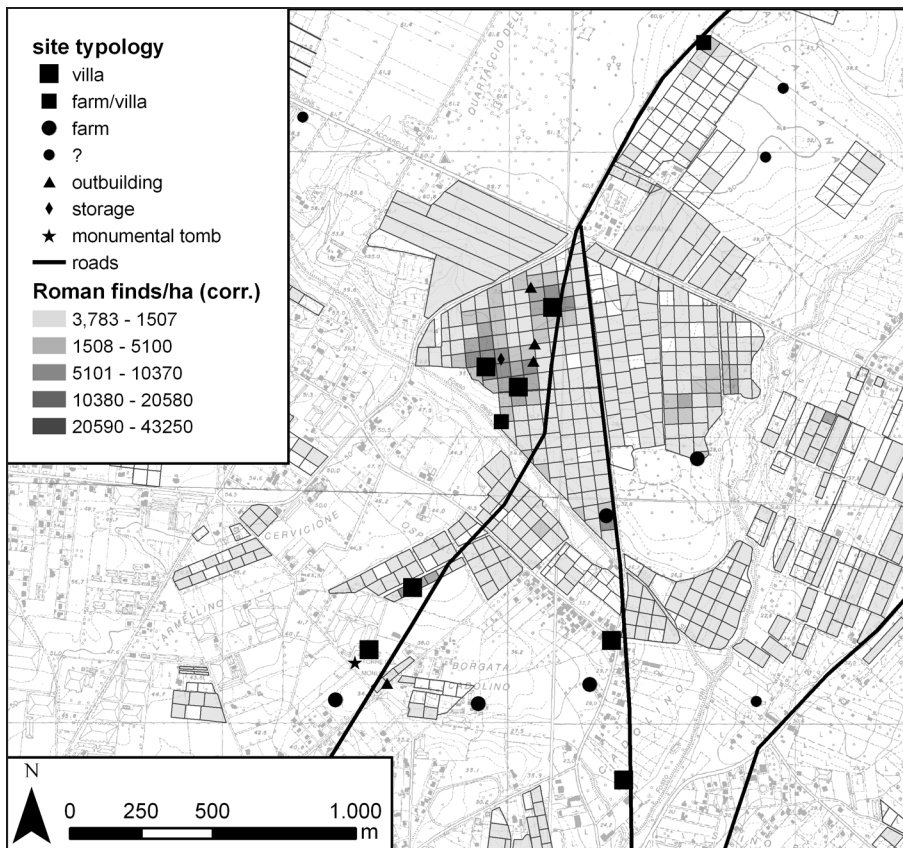

Fig. 12. Distribution of Imperial sites along the Roman roads in the Campana area (Drawing T.C.A. de Haas, RUG/GIA).

A good example of this can be seen in the Campana area (fig. 11). Here we have evidence of three large sites marked by the presence of luxury features (painted wall plaster, marble and *tesserae*) besides the usual assemblage of building debris, *tegula* and various ceramic groups (*i.e.* table ware, coarse ware, amphora and dolium). Close to these larger sites we observed several smaller concentrations of mainly building debris, probably to be interpreted as outbuildings. In the surrounding area we observed relatively high off-site densities, which may indicate intensive use of the land in this period (see also De Haas, forthcoming). This pattern is believed to reflect the presence of several *villa* estates.

Remarkably, many of the Republican-period settlements to the east (discussed above) may by this time already have been deserted. Zooming out, it is clear that along the two important metalled roads running across the Campana area to the coast (fig. 12) larger sites (*villa* estates) have become more numerous.

The importance of these roads is even more apparent in the Late Imperial and post-Roman periods. Although we have only few diagnostic artefacts for these periods (mainly late African red slip types), continuity is observed almost exclusively at sites located directly on the Roman roads (*cf.* Attema *et al.*, forthcoming a; forthcoming b).

5. CONCLUSION

The Astura and Nettuno survey campaigns carried out between 2003 and 2005 by the PRP in the immediate surroundings of Nettuno and in the lower Astura valley have furnished new insights into various aspects of the archaeology of the coastal landscape of the Pontine Region.

In the first report we discussed the lithic record of the surveys in both the Astura and Nettuno areas. There is evidence of human presence in the area for the Middle and Upper Palaeolithic periods. The lithic record provides us with a spatial context for lithic sites excavated in the past: one new site was discovered, while occasional lithic artefacts occur throughout the study area. Although present, Neolithic finds are less abundant: a few obsidian artefacts were found, but Neolithic ceramics are absent in the surface record.¹²

Substantial amounts of surface artefacts only occur from the Bronze Age onwards. However, our knowledge of this period depends foremost on the study of diagnostic sherds kept at the local museum and from excavated contexts, to which we can occasionally link our surface observations. For instance, in our discussion of the *impasto* finds of the Campana area, we were able to link non-diagnostic *impasto* distributions to Middle Bronze Age finds from the museum collection. In this way, the project added to the results of previous GIA excavations of contexts from this period (Attema *et al.*, 2003; Nijboer

et al., 2006). In combination, the data are important to our understanding of growing socio-economic complexity in Bronze Age Latium (as summarized in Alessandri, 2009: 582–589).

Evidence for the Early Iron Age is sparse in the survey record, as diagnostic materials of this period in general have broad date ranges. Only from the 7th century BC onwards do we have a number of diagnostic wares (*impasto rosso*, *bucchero* and an occasional Etrusco-Corinthian sherd). Sites identified on the basis of these materials are thought to testify to a rural expansion into the territories of the proto-urban settlements of *Satricum* and *Antium*. This process of rural infill is especially evident in the Archaic period, as sites with Archaic *tegulae* and pottery occur frequently. The cases presented in the first report (site 15115) and above (site 15108) show that these sites come in at least two types, probably representing farmsteads and hamlets.

It proved difficult to identify post-Archaic sites in the study area, as there are few ceramic types and wares typical only for this period. However, closer study of the *tegulae* from the surveys show that there are many (probable) post-Archaic settlements in the Quarto delle Cintonare area, while in other parts of the survey area many Republican sites may have a post-Archaic phase. *Tegula* production took place at rural sites in the Cintonare area, which may indicate that *Satricum* had lost its economic importance for this area.

The abundance of Republican-period pottery indicates that the number of rural sites increased, and such Republican sites occur throughout the surveyed area. These rural sites were probably modest farmsteads, but larger estates may also have developed (for example site 15036). The road through the Campana district already was an important connection between these rural farms and *Antium*. *Satricum* had by now certainly lost its central role.

The survey data show that by the Imperial period, a clear rural-site hierarchy had developed: besides simple farms we have a range of larger and more luxurious *villae*. Such *villae* mainly occur along the *via Selciatella*, while in the Astura valley simpler farms are more numerous. *Villae maritimae* occur near *Antium* and northwest of the mouth of the Astura, and the presence of amphorae manufactured at one of these *villae* on farms in the Astura valley may suggest a strong socio-economic bond between these coastal *villae* and the farms in the Astura valley. This idea is also supported by their simultaneous abandonment in the Mid Imperial period.

By contrast, the *villae* along the *via Selciatella* show continuity into the Late Imperial, and in some cases even into the Early Medieval period. Apparently their location near, and strong socio-economic ties with *Antium* were crucial to their survival. In the course of the 6th century AD, these sites too were abandoned.

6. FURTHER WORK

This article, together with the first preliminary report, presents the survey data of the Astura and Nettuno surveys of 2003, 2004 and 2005. A synthesis of the evidence, in combination with GIA's previous work on coastal sites and recent studies of the museum collection, is forthcoming (Attema *et al.*, 2009; forthcoming a). Besides this synthesis, the surveys have also led to a number of additional studies.

First of all, additional fieldwork took place between 2006 and 2008. This fieldwork comprised site revisits and intensive on-site surveys to further improve our understanding of site chronology and typology (Tol, forthcoming). At the same time, excavations took place at the mouth of the Astura river, where evidence for late Imperial and early Medieval occupation was recently discovered (Attema *et al.*, forthcoming b). Besides new fieldwork, the block survey data were studied in closer detail as part of an intra-regional comparative study of Roman colonization and land use (De Haas, forthcoming). Finally, the synthesis provided a basis for case studies on economic growth and demographic developments during the Roman period (Attema *et al.*, forthcoming c; Attema & De Haas, forthcoming).

7. NOTES

1. www.palaeohistoria.nl.
2. Two other early centres are mentioned in the written sources, *Caenon* and *Astura*. However, there is no archeological evidence of either of them. In 2007/08 the GIA mapped an area close to the mouth of the Astura river. Here only occasional fragments of Iron-Age and Archaic date were encountered.
3. For *Satricum*, See Gnade, 2007; for *Antium*, see Brandizzi Vittucci, 2000; see also Attema *et al.*, forthcoming: chapter 3.
4. Later topographic studies (Chiarucci, 1989; Brandizzi Vittucci, 2000; Caneva & Travaglini, 2003) build primarily on Lugli's work.
5. After careful study of the museum collection it appeared that 17 additional sites known to Liboni were not indicated on his map. Since this knowledge was obtained after the conclusion of the Liboni revisits, the presented calculations will be based on the original 68 sites.
6. In the first report we commented on the Iron Age in more detail, but the 2004/2005 surveys yielded scant data for this period.
7. All distribution maps present densities corrected for visibility and coverage; for the method, see De Haas, forthcoming.
8. As the Iron Age materials from Campana in the museum collection have not yet been studied, future identification of Iron Age activity in the area, as initially proposed for the Campana area on the basis of the survey, cannot be excluded.
9. See also Cifani, 2002 for a classification of Archaic rural sites.
10. The chronological value of these fabrics mainly derives from fabric research on stratified contexts from *Satricum*; cf. Attema *et al.*, 2003.

11. We should stress that in this case the earlier material covers the same area as the later *villa* discussed below.
12. However, on the 16th of May, 2009, an Eneolithic tomb was found in the survey area near Torre Astura.

APPENDIX: CATALOGUE OF SITES SURVEYED IN 2004/2005

This catalogue of sites presents information about all sites surveyed in 2004/2005 during both revisits and block surveys. If collected, diagnostic sherds are also presented in this catalogue. The diagnostic finds gathered during revisits in 2003 were presented in the first report, on our surveys in the Astura valley (Attema *et al.*, 2007/08). Off-site finds are listed in the final part of the catalogue.

SITE DESCRIPTION

The description of each site consists of:

- Site identifiers (Piccarreta or Liboni site ID and a five-digit site ID assigned by us);
- A toponym, where available;
- Site coordinates (projected Roma 1940 Gauss Boaga est);
- A description of the geography of the site, present-day land use, visibility conditions and survey method;
- A description of the types of samples collected and the number of fragments included in the catalogue;
- A description of the finds; those collected in 2003 (presented in the first preliminary report), those picked up in 2004/2005 and those collected by Piccarreta and/or Liboni are presented separately;
- Any remarks;
- References to previous publications mentioning the site.

SHERD DESCRIPTION

Each site description is followed by descriptions of the diagnostic artefacts and accompanying drawings (scale 1:2). Because of the abundance of African red slip ware fragments, all fragments belonging to this ware could be listed in a typo-chronological table (see table 1). This table lists each type (in most cases referring to a Hayes form number [Hayes, 1972]), the number of fragments belonging to the type, its date range and a list of sites at which this form occurs. Each type is illustrated by a single or – in cases of wide variation – several drawings. Table 2 lists all fragments of coarse wares of which more than one example was found during the fieldwork (coarse ware types occurring only once are not included in the table, but displayed in the catalogue).

The diagnostic artefacts are presented in the following nine groups: *impasto*; *tegulae*; large storage and transport vessels; coarse and depurated wares; fine wares; utilities; metal; glass; and miscellaneous. In the following, the terms and abbreviations used in the catalogue are explained, serving as an introduction to the sherd descriptions and drawings. The descriptions are, whenever possible, based on the description method used in the *Satricum* excavations (Maaskant-Kleibrink, 1987: 137 ff.). The following characteristics are included for every artefact:

- A sherd identifier, referring to the sherd drawing, and the unique sherd number that consist of: the survey code, usually Net'04 or Net'05 (Nettuno 2004 or 2005), followed by a unit number and an individual sherd number. For resurveyed Piccarreta or Liboni sites, a site code, consisting of a P (Piccarreta) or L (Liboni) and a site number are mentioned, again followed by an individual sherd number.
- A description of the kind of fragment (base, body, neck, rim, handle, etc.) as well as, whenever possible, the vessel shape.
- A description of the ware; since no fabric analyses were done, this ware classification can only be very general and sometimes wares are classified on the basis of their surface finish. The following wares were distinguished:
 - Impasto*: hand-made coarse pottery, dating between the Bronze Age and the Archaic period;
 - Coarse ware*: wheel-thrown pottery with large (visible to the naked eye) inclusions;
 - Depurated ware*: wheel-thrown pottery with very few or no inclusions visible to the naked eye. Generally, this material is of a very thin, powdery fabric, although also amphora sherds may be classified as depurated ware. Part of this class of material may actually be black glazed, *terra sigillata* or even African red slip ware; conservation conditions for surface finds may cause the slip coating to be partially or totally eroded;
 - Black glazed*: wheel-thrown fine pottery of Republican date with a brown to black slip;
 - Terra sigillata*: wheel-thrown fine pottery with a red slip. This class is generally of Italian origin, dating from approximately 30 BC to the mid 2nd century AD (CFTS, 1990);
 - African red slip ware*: a class of very common kitchen and fine ware, produced in Northern Africa from the end of the 1st century AD onwards (Hayes, 1972).
- A detailed description of the vessel profile; the shape of the base, body, neck, rim and lip are described, as well as the shape of the section of any handles, and surface features (handle attachments, decorations, grooves or ridges).
- For every sherd, a Munsell code records its surface colour (based on the Munsell chart of 1975). Where a fresh fracture is present, core colour is given as well;

for *terra sigillata* and black-glazed ware the slip colour is mentioned separately from the core colour.

- For every sherd, characteristic measurements are given. Measurements without abbreviations indicate maximum width and maximum height, in position. The following abbreviations are used:

L: Length

W: Width

S: Length and width of a section (of a handle);

D: Diameter (of a rim, base or sometimes wall, measured on the outside of the vessel);

H: Height of rim, base or entire sherd in position;

T: Thickness (of a rim or wall).

- Any observations not mentioned in the standard description are noted, as well as a reference to one of the types listed in the above-mentioned typological tables, when applicable.
- When available, references to parallels and a dating are provided.

Dates for African red slip ware follow those recently proposed by Bonifay (2004). Dates for *terra sigillata* derive from *CFTS* (1990). For the black glazed fragments, we follow the recent revision of the *Gruppo dei Piccoli Stampigli* dates, as published in Stanco (2004) and Ferrandes (2006); Morel shapes 2783/84 and 2926/27 are dated as 3rd-2nd century BC, the *rosette* and *palmette* stamps are dated to the 3rd century BC. Coarse ware parallels in general are found in local and/or regional contexts, as published in Bouma (1996), Olcese (2003) and Paroli & Vendittelli (2004). For identifying and dating amphora fragments, the database of the *University of Southampton Amphora Project* was used (*USAP*, 2005).

**3. Net'04 2440/01/1**

Rim fragment of a tile
 Depurated ware
 Rectangular profile with rounded
 internal angle and faceted external angle;
 lip flattened
 10YR 8/2 white
 L x W 6.8 x 5.2; Hrim 4.6; Tplate 2.3
 Not drawn

*Large storage and transport vessels***4. Net'04 2440/02/01**

Coarse ware
 Rim fragment of a dolium
 Flaring wall; short horizontal rim, outcurving into wall.
 Interior transition into wall is thickened; convex lip
 5YR 6/6 reddish yellow
 H 5.4; 10.5 x 2.5 - 4.2 (rim at angle); D ?

Piccarreta site 69 (Site 11269)

Toponym:	Casale Nuovo
Coordinates:	X: 2333318, Y: 4591419
Location and method:	The site is located just north of the river Astura south of Casale Nuovo. After a revisit to a field a little to the west in 2003, the area was surveyed systematically in 2004 under low visibility conditions (the area was ploughed but vegetation limited surface visibility). An artefact concentration of c. 0.44 ha was mapped in units 2433, 2434 and 2440. Later during the 2004 campaign, the site was revisited a second time.
Samples:	standard samples (4 catalogued fragments)
Finds 2004/2005:	<i>impasto</i> ; tile; coarse and depurated ware; glazed ware; iron slags
Finds 2003:	tile (<i>a.o.</i> Archaic fabric); coarse ware (<i>a.o.</i> Archaic fabric); dolium; iron slags
Finds Piccarreta:	tile; pieces of tuff and <i>peperino</i> ; brick; coarse ware; amphora; kiln debris/slags
Remarks:	The site is located c. 125 m southwest of the location indicated by Piccarreta
Reference:	Piccarreta, 1977: 87; Attema <i>et al.</i> , 2008: 463

Piccarreta site 77 (Site 11277)

Toponym:	Spinacceto
Coordinates:	X: 2331449, Y: 4593159
Location and method:	The site is situated west of the river Astura, north of one of its tributaries in an area known as Spinacceto/Foci Mancino. The area was surveyed systematically in 2004 under medium visibility conditions (the area was fallow at the time). An artefact concentration of c. 0.43 ha was mapped in units 1266, 1267, 1286 and 1289; one additional transect was surveyed in the area between the two systematically surveyed fields (unit 3003).
Samples:	standard and diagnostic samples (18 catalogued fragments)
Finds 2004/2005:	tile (probably post-archaic fabric); coarse and depurated ware (<i>a.o.</i> Archaic fabric); amphora; dolium (Archaic fabric); black glazed; <i>terra sigillata</i>
Finds Piccarreta:	tile ("sabbiate e non sabbiate"); brick; coarse ware; amphora; <i>terra sigillata</i>
Remarks:	-
Reference:	Piccarreta, 1977: 88; Attema <i>et al.</i> , forthcoming a

Tiles

1. Net'04 1286/03/3

Rim fragment of a tile
Coarse ware
Rectangular profile with flattened external angle, rounded internal angle; lip convex flattened
Exterior/interior 7.5YR 8/2 pinkish white; core 7.5YR 8/4 pink
Hrim 5.4
Not drawn

2. Net'04 1289/04/1

Rim fragment of a tile
Coarse ware
Rectangular profile with rounded internal and external angle; lip slightly convex
Exterior 10YR 8/3 very pale brown; interior 7.5YR 8/4 pink; core 5YR 7/3 pink to 5YR 8/3 pink
L x W 9.7 x 9.2; Hrim 5.8; Tplate 2.7
Not drawn

3. Net'04 1289/07/1

Rim fragment of tile
Coarse ware
Rectangular profile with rounded internal angle and flattened external angle; lip flattened
Exterior/interior 7.5YR 8/4 pink; core 5YR 8/4 pink to 5YR 7/4 pink
L x W 9.7 x 9.2; Hrim 5.8; Tplate 2.7
Not drawn

4. Net'04 3003/01/D.S./20

Coarse ware
Rim fragment of a tile
Rectangular profile with rounded external and internal angle; lip convex
Exterior 7.5YR 7/4 pink; core 7.5YR 6/4 light brown
L x W 5.2 x 10.3; Hrim 5.7; Tplate 1.8
Not drawn

Large storage and transport vessels

5. Net'04 1266/02/1

Spike fragment of an amphora
Coarse ware
Solid cylindrical spike, lower side flattened
Exterior/interior 5YR 8/3 pink and 5YR 6/4 light reddish brown; core 5YR 6/6 reddish yellow and 7.5YR 6/2 pinkish gray
H 5.4; Dspike 5.8
Not drawn

6. Net'04 1267/01/1

Coarse ware
Handle fragment of an amphora
Vertical band handle, oval in section
Exterior/interior 10YR 7/4 very pale brown and 10YR 6/2 light brownish gray; core 2.5YR 6/6 light red
H 5.2; shandle 4.7 x 2.1
Not drawn
Graeco-Italic or Dressel 1 (mid 4th - late 1st century BC)

7. Net'04 3003/01/2

Spike fragment of an amphora
Coarse ware
Cylindrical solid spike, lower side convex
Exterior 5YR 7/4 pink; core 5YR 5/4 reddish brown
H 7.6; Dspike 3.4
Not drawn

8. Net'04 3003/01/D.S./2

Handle fragment of an amphora
Coarse ware
Vertical ringhandle, round to oval in section
Exterior 5YR 6/6 reddish yellow; core 5YR 6/6 reddish yellow
H 4.9; Shandle 3.8 x 2.7
Not drawn

9. Net'04 3003/01/D.S./3

Handle fragment of an amphora
Coarse ware
Vertical ringhandle, oval to round in section
Exterior 10YR 8/4 very pale brown; core 7.5YR 8/4 pink
H 5.6; Shandle 4.3 x 2.4
Not drawn

10. Net'04 3003/01/D.S./11

Handle fragment of an amphora
Coarse ware
Vertical band handle, oval in section
Exterior 5YR 6/6 reddish yellow; core 5YR 7/6 reddish yellow
H 7.3; Shandle 5.4 x 2.8
Not drawn

*Coarse and depurated wares***11. Net*04 1286/03/1**

Coarse ware
Base fragment
Circular base ring, convex edge; exterior base is convex, inside flat
Exterior/interior 2.5YR 6/8 light red; core 10YR 5/1 gray
H 2.4; Tbase 0.6; Tbase ring 0.8; D ?

12. Net*04 3003/01/4

Depurated ware
Rim fragment
Straight rim thickened on the outside and undercut, inside concave;
pointed lip
Exterior/interior 7.5YR 8/4 pink; core 5YR 8/3 pink
H 1.9; Twall 0.7; Trim 1.3; D ca. 20.0

13. Net*04 3003/01/5

Coarse ware
Rim fragment of a bowl/teglia
Spreading wall; straight rim thickened on the inside and outside;
convex lip
Exterior 5YR 6/3 light reddish brown and 10YR 6/1 gray; interior 5YR
6/4 light reddish brown; core 2.5YR 6/8 light red
H 3.3; Twall 0.7; Trim 1.2; D 20

14. Net*04 3003/01/6

Depurated ware
Handle fragment
Ring handle, round in section
Exterior 7.5YR 8/4 pink; core 10YR 8/1 white
H 4.5; Shandle 1.7 x 1.6
Not drawn

15. Net*04 3003/01/D.S./24

Handle fragment
Coarse ware
Vertical ringhandle, round in section
Exterior 5YR 6/4 light reddish brown; core 5YR 6/4 light reddish
brown
H 5.1 ; Dhandle 2.1
Not drawn

*Fine wares***16. Net*04 3003/01/D.S./21**

Black Glazed
Rim fragment of a plate
Flaring wall, straight rim, slightly thickened on the inside; convex lip
Glaze: -; core 2.5YR 6/6 light red
H 1.6; Trim 0.5; D 18
Morel, 1981: series 2230 (2232c1?) (250 – 225 BC)

17. Net*04 1286/04/01

Terra sigillata
Rim fragment of a plate
Slightly outcurving rim, in turning towards the wall with the transition
on the inside marked by a groove and on the outside by a thickened
part with a groove below. The interior of the rim bears another two
grooves; convex lip
Slip 2.5YR 5/6 red; core 5YR 8/3 pink
H 2.2; Twall 0.5; Trim 0.4 ; D 18
CFTS 1990: form 21 (Augustan/Tiberian)

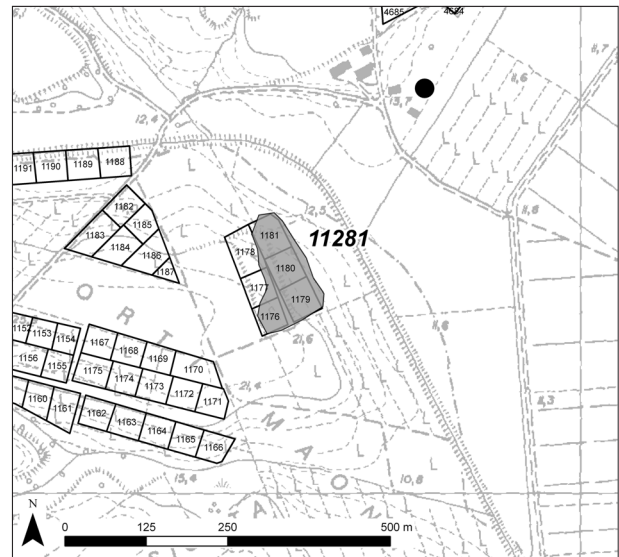

18. Net*04 3003/01/3

Rim fragment of a lid
African red slip ware
Spreading wall; straight rim thickened on the inside and outside with a
groove on the inside; convex lip
Exterior 5YR 7/8 reddish yellow; interior 5YR 7/6 reddish yellow;
core 2.5YR 5/8 red
H 2.1; Twall 0.9; Trim 1.0; D 30
Hayes, 1972: form 185 (end 2nd - mid 3rd century AD); figure 1.37

Piccarreta site 80 (Site 11280)

Toponym:	Orti Maoni/Intossicata
Coordinates:	X: 2331886. Y: 4593902
Location and method:	The site is located on the west bank of the Astura river, directly south of one of its tributaries. It had already been revisited in 2003, when a scatter of some 20x30 m was mapped. During a second revisit in 2004 (unit 3002) the location was in use as a corn field; the edge of this field was inspected.
Samples:	grab sample (no catalogued fragments)
Finds 2003:	hut loam; tile; coarse ware (<i>a.o.</i> Archaic fabric)
Finds 2004/2005:	tile; coarse ware
Finds Piccarreta:	tile ("sabbiate e non sabbiate"); brick; coarse ware; amphora
Finds Liboni:	black glazed
Remarks:	-
Reference:	Piccarreta, 1977: 88; Attema <i>et al.</i> , 2008: 465; Attema <i>et al.</i> , forthcoming a

Piccarreta site 81 (Site 11281)

Toponym:	Orti Maoni/Pantano dell'Intossicata
Coordinates:	X: 2331703. Y: 4594453
Location and method:	The site is located on the west bank of the Astura river; the eastern part of the hill on which it was situated has been levelled, destroying part of the site. The site had already been revisited in 2003, when in 2004 the western part of the hill, a ploughed vineyard and a melon field, was surveyed systematically under good visibility conditions. The main cartefact concentration was found in an area of c. 1.24 ha in units 1176-1181, but as said the site originally extended beyond the surveyed area.
Samples:	standard and grab samples (23 catalogued fragments)
Finds 2003:	tile; coarse ware (<i>a.o.</i> Archaic fabric)
Finds 2004/2005:	tuff and limestone building debris; tile; coarse ware (<i>a.o.</i> Archaic fabric); amphora; dolium (<i>a.o.</i> Archaic fabric); depurated ware; black glazed; <i>terra sigillata</i> ; African red slip ware; vessel glass; iron
Finds Piccarreta:	tile ("sabbiate e non sabbiate"); brick; coarse ware; amphora
Finds Liboni:	impasto; coarse and depurated ware (<i>a.o.</i> Archaic fabric); black glazed; <i>terra sigillata</i> ; African red slip ware; vessel glass
Remarks:	a basalt pavement stone was observed at a nearby farmhouse
Reference:	Piccarreta, 1977: 88; Attema <i>et al.</i> , 2008: 466; Attema <i>et al.</i> , forthcoming a

Tiles

Piccarreta site 91 (Site 11291)

Toponym:	-
Coordinates:	X: 2331961. Y: 4595169
Location and method:	The site is located directly west of the Astura river, overlooking the river valley. The site had already been revisited in 2003; the area, although fallow and with very low visibility, was surveyed systematically in 2005. Ceramic densities were highest in units 4681 and 4683, but there was no clearly delimited scatter.
Samples:	standard samples (1 catalogued fragment)
Finds 2003:	tile (probably post-archaic fabric); coarse ware (<i>a.o.</i> Archaic fabric); dolium (Archaic fabric)
Finds 2004/2005:	impasto (Archaic fabric); tile; coarse ware; black glazed; loom weight
Finds Piccarreta:	tile ("sabbiate"); coarse ware ("sabbiate e non sabbiate")
Remarks:	-
Reference:	Piccarreta, 1977: 88; Attema <i>et al.</i> , 2008: 469

Utilities

1. Net'05 4681/03/1

Coarse ware
Fragment of a loom weight
Rectangular loomweight with flattened sides and rounded edges with pierced hole in the upper part; lower part is slightly wider than the upper part

H 9.1; L x W 5.7 x 3.2; Dhole 1.1

Piccarreta site 94 (Site 11294)

Toponym:	Quarto delle Cinfonare
Coordinates:	X: 2332484. Y: 4595952
Location and method:	The site is located directly west of the Astura river, overlooking the river valley. The site had already been revisited in 2003; in 2005 the fields directly to the northwest of the location indicated by Piccarreta were surveyed systematically. Although visibility conditions were low, (the field lay fallow and was covered with vegetation) relatively high densities of material were observed in units 4686 and 4687.
Samples:	standard samples (no catalogued fragments)
Finds 2003:	impasto (<i>a.o.</i> <i>impasto rosso</i>); tile (<i>a.o.</i> Archaic fabric); coarse and depurated ware (<i>a.o.</i> Archaic fabric); dolium (Archaic fabric); African red slip ware
Finds 2004/2005:	impasto (Archaic fabric); <i>bucchero</i> ; tile; coarse and depurated ware; amphora; dolium
Finds Piccarreta:	ruins of vaulted rooms and cuniculi; piece of a mosaic; tile ("sabbiate"); brick; coarse ware; amphora; dolium
Remarks:	-
Reference:	Piccarreta, 1977: 88; Attema <i>et al.</i> , 2008: 470

Piccarreta site 97 (Site 11297)

Toponym:	Quarto delle Cinfonare
Coordinates:	X: 2332260. Y: 4596298
Location and method:	The site is located west of the Astura river in the area of Quarto delle Cinfonare. The site had already been revisited in 2003 when the western part of the area was surveyed systematically in 2004; the core of the site was subsequently surveyed in 2005. In both years the visibility conditions were good. The main scatter measured some 0.52 ha and is located in units 4494 and 4495, extending into units 2522 and 2523.
Samples:	standard and diagnostic samples (no catalogued fragments)
Finds 2003:	tile (probably post-archaic fabric); coarse ware (<i>a.o.</i> Archaic fabric); leucite-basalt grinding stone
Finds 2004/2005:	<i>impasto</i> (Archaic fabric); limestone debris; tile; coarse and depurated ware; amphora; dolium; black glazed; <i>terra sigillata</i> ; tile wasters
Finds Piccarreta:	pieces of tuff; tile (“sabbiate”); coarse ware (<i>a.o. ollae</i>); dolium; large cylindrical grinding stone with central hole; bricks of a kiln; slags/wasters
Remarks:	-
Reference:	Piccarreta, 1977: 88; Attema <i>et al.</i> , 2008: 472

Piccarreta site 98 (Site 11298)

Toponym:	Quarto delle Cinfonare
Coordinates:	X: 2332066. Y: 4596315
Location and method:	The site is located west of the Astura river in the area of Quarto delle Cinfonare. The site had already been revisited in 2003 when the area was surveyed systematically in 2004 under good visibility conditions (the fields were harrowed). The main concentration covered some 0.80 ha, in units 2497, 2499, 2502, 2503, 2505 and 2509, but high artefact densities continued into unit 2514.
Samples:	standard samples (no catalogued fragments)
Finds 2003:	<i>impasto</i> (red sandy lumps); tile (probably post-archaic fabric); coarse and depurated ware (<i>a.o.</i> Archaic fabric); black glazed; leucite-basalt grinding stone
Finds 2004/2005:	<i>impasto</i> ; limestone debris; tile; tile wasters; coarse and depurated ware; black glazed
Finds Piccarreta:	pieces of tuff; tile (“sabbiate”); coarse ware (<i>a.o. ollae</i>); dolium; large cylindrical grinding stone with central hole; bricks of a kiln; slags/wasters
Remarks:	-
Reference:	Piccarreta, 1977: 88; Attema <i>et al.</i> , 2008: 472/473

Piccarreta site 104 (Site 11304)

Toponym:	Quarto del Cerrone
Coordinates:	X: 2331329, Y: 4595574
Location and method:	The site is located west of the Astura river in the area of Quarto del Cerrone. The area was surveyed systematically in 2005 under medium visibility conditions (the area, a vineyard, was unworked). At the location mapped by Piccarreta (unit 4640) only a slight concentration of sherds was observed, whereas c. 100 m to the east there was a clearly delimited small scatter of c. 0.11 ha in unit 4645.
Samples:	standard and diagnostic samples (no catalogued fragments)
Finds 2004/2005:	impasto; tuff debris; tile (probably post-archaic fabric); coarse ware; amphora; black glazed
Finds Piccarreta:	tile ("sabbiate"); coarse ware
Remarks:	-
Reference:	Piccarreta, 1977: 88

Liboni site 1 (Site 15001)

Toponym:	Cadolino
Coordinates:	X: 2325463, Y: 4595983
Location and method:	The site is located west of the Loricina stream. An attempt to revisit the site was made in 2005, but its location was overbuilt. In the adjacent area, consisting of a wooded area and a fallow field, hardly any archaeological material was visible
Samples:	no samples
Finds 2004/2005:	tile; coarse ware; amphora; <i>terra sigillata</i>
Finds Liboni:	tile; wall plaster; <i>tesserae</i> ; coarse ware; amphora; <i>terra sigillata</i> ; African red slip ware
Remarks:	-
Reference:	Attema <i>et al.</i> , forthcoming a

**3. Net'05 4163/01/3**

Rim fragment of a lid
 African red slip ware
 Spreading wall; straight rim slightly thickened on the outside; convex lip
 Exterior 2.5YR 6/6 light red; lip 5YR 5/2 reddish grey
 H 2.4; Twall 0.65; Trim 0.8 ; D 22
 Hayes, 1972: form 196 (2nd - mid 3rd century AD);
 figures 1.38-1.39

Liboni site 2 (Site 15002)

Toponym: Cadolino
 Coordinates: X: 2325344. Y: 4596317
 Location and method: The site is located west of the Loricina stream, south of one of its main tributaries. The site was revisited in 2005, but as its location had recently been sown in, only the edge of the field it lies in was inspected
 Samples: grab sample (3 catalogued fragments)
 Finds 2004/2005: coarse ware; *terra sigillata*; African red slip ware
 Finds Liboni: coarse ware; *terra sigillata*; African red slip ware
 Remarks: -
 Reference: Attema *et al.*, forthcoming a

 H 2.1; Twall 0.85; Trim 1.2; D ?
 Very worn
 Hayes, 1972: form 197 (late 2nd - 3rd century AD);
 figures 1.40-1.41

Liboni site 4 (Site 15004)

Toponym:	Ospedaletto
Coordinates:	X: 2324723. Y: 4596657
Location and method:	The site is located west of the Loricina and south of the Sbirro stream. The northern part of the site was systematically surveyed in 2004 under medium to good visibility conditions (harrowed with a variable amount of vegetation), the southern part of the site lay fallow and was grab sampled (unit 2191). The main concentration of building debris lay in an area of some 0.17 ha in units 2187 and 2188, but high pottery densities extended into unit 2189. The site was revisited both in 2004 and 2005 to see if the area to the south could be surveyed systematically, but again visibility conditions were too low.
Samples:	standard, grab and diagnostic samples (110 catalogued fragments)
Finds 2004/2005:	limestone and tuff building debris; tile (<i>a.o.</i> Archaic fabric); coarse and depurated wares; amphora; black glazed; <i>terra sigillata</i> ; African red slip ware; vessel glass; iron; oil lamp fragments; painted wall plaster; <i>tesserae</i>
Remarks:	-
Reference:	Attema <i>et al.</i> , forthcoming a

Tiles

1. Net'04 2187/02/1

Rim fragment of a tile
Coarse ware
Rectangular profile with rounded internal angle; beveled external angle; convex lip
Exterior/interior 10YR 8/2 white to 10YR 7/2 light gray; core 7.5YR 8/4 pink to 7.5YR 7/4 pink
L x w 9.6 x 7.2; Hrim 6.0; Tplate 2.5
Not drawn

2. Net'04 2187/06/1

Rim fragment of a tile
Coarse ware
Rectangular profile with rounded internal angle; beveled external angle; convex lip
Exterior/interior 10YR 8/2 white; core 5YR 7/4 pink
L x W 6.6 x 5.8; Hrim 5.9; Tplate 2.4
Not drawn

3. Net'04 2187/07/20

Rim fragment of a tile
Coarse ware
Rectangular profile with rounded internal and external angle; lip damaged
Exterior/interior 5YR 7/3 pink; core 5YR 8/2 pinkish white
L x W 14.0 x 11.3; Hrim 7.1; Tplate 3.6
Not drawn

4. Net'05 2188/05/22

Rim fragment of a tile
Coarse ware
Triangular profile with rounded internal and external angle
Exterior 2.5YR 6/6 light red; 5YR 7/4 pink; 2.5YR 6/6 reddish yellow
Hrim 6.5; Tplate 2.6
Not drawn

5. Net'04 2191/01/1

Rim fragment of a tile
Coarse ware
Rectangular profile with rounded internal and external angle; flattened lip
Exterior/interior 7.5YR 6/2 pinkish gray to 7.5YR 7/4 pink; core 5YR 7/6 reddish yellow
L x W 10.4 x 6.9; Hrim 6.0; Tplate 2.7
Not drawn

6. Net'04 2191/01/2

Rim fragment of a tile
Depurated ware
Rectangular profile with rounded internal angle, faceted external angle; lip convex
Exterior 5YR 8/3 pink; interior 5YR 7/6 reddish yellow; core 5YR 7/4 pink
L x W 8.6 x 5.1; Hrim 4.9; Tplate 1.6
Not drawn

7. Net'04 2191/01/6

Rim fragment of a tile
Depurated ware
Rectangular profile with rounded internal and external angle; lip beveled on the inside
5YR 7/6 reddish yellow
Hrim 6.1; Tplate 2.6
Not drawn

8. Net'04 L4/03/2

Rim fragment of a tile
Coarse ware
Rectangular profile with flattened external angle; lip bevelled on the outside
Exterior 2.5Y 6/2 light brownish grey; core 10YR 8/3 very pale brown
L x W 3.4 x 10.3; Hrim 6.6; Tplate 2.2
Not drawn

9. Net'04 L4/04/2

Rim fragment of a tile
Coarse ware
Rectangular profile with rounded internal and external angle; lip flattened
Exterior 5YR 5/3 reddish brown; core 5YR 5/4 brown
Hrim 6.5; Tplate 2.7
Not drawn

10. Net'04 L4/04/4

Rim fragment of an imbrex
Coarse ware
Semirounded imbrex with flattened edge
Exterior 5YR 6/6 reddish yellow; core 5YR 5/4 reddish brown
L x W 7.3 x 8.1; T 1.9
Not drawn

*Large storage and transport vessels***11. Net'04 2188/02/2**

Spike of an amphora

**Liboni site 5 (Site 15005)**

Toponym: Piscina Cardillo
 Coordinates: X: 2326205. Y: 4597255
 Location and method: The site is located on a hill directly east of the Quinto stream. The site was revisited in 2004, but only few artefacts were observed at that time. In 2005 the area was systematically surveyed under medium visibility conditions (the area lay fallow and had some vegetation); a clear concentration of c. 0.11 ha was mapped in unit 2689.
 Samples: standard and total samples (no catalogued fragments)
 Finds 2004/2005: impasto (Archaic fabric); tile (*a.o.* Archaic fabric; probably post-archaic fabric); coarse ware; amphora; dolium; black glazed
 Finds Liboni: impasto; bucchero; coarse ware (*a.o.* Archaic fabric); black glazed
 Remarks: -
 Reference: Attema *et al.*, forthcoming a

Liboni site 10 (Site 15010)

Toponym:	La Campana
Coordinates:	X: 2325759, Y: 4597591
Location and method:	The site is located west of the Quinto stream in the Campana area. It was revisited in 2004 under adverse visibility conditions; in 2005 the area was surveyed systematically under medium to good conditions (harrowed with some vegetation). During survey a rather large scatter (1.06 ha) of protohistoric impasto was mapped in units 4226/4227, 4249-4251 and 4258/4259, but surrounding units also contain protohistoric material.
Samples:	standard and total samples (3 catalogued fragments)
Finds 2004/2005:	impasto; spindle whorl
Finds Liboni:	lithic; impasto
Remarks:	Liboni also mapped a protohistoric site across the road (site 15007 which was not encountered during our surveys), which may well be the continuation of this site; off-site roman material also occurs in the area (diagnostics are included in the off-site section of this catalogue)
Reference:	Attema <i>et al.</i> , forthcoming a; Alessandri, 2007: 74

*Impasto***1. Net'05 4226/01/1**

Liboni site 14 (Site 15014)

Toponym:	La Campana
Coordinates:	X: 2325213. Y: 4597638
Location and method:	The site is located in the fork between the Sbirro and Quinto streams in the Campana area. After a short visit in 2004 the site was systematically surveyed in 2005 under medium visibility conditions (ploughed but very dusty field). The main concentration measured c. 1 ha in units 4016-4018, 4023-4025 and 4032-4034 with a small second concentration somewhat to the northwest (see site 15128 below; material from unit 4032 is listed here, but some of it may stem from site 15128). The site was revisited later that year.
Samples:	Standard, diagnostic and grab samples (208 catalogued fragments)
Finds 2004/2005:	limestone and tuff debris; tile; brick; marble; painted plaster; <i>tesserae</i> ; coarse and depurated ware; amphora; dolium; black glazed; <i>terra sigillata</i> ; African red slip ware; bronze; lead; iron; vessel glass
Finds Liboni:	lithic; impasto; tile; marble; painted plaster; <i>tesserae</i> ; coarse and depurated ware; amphora; fine ware; black glazed; <i>terra sigillata</i> ; African red slip ware; oil lamp fragments; bronze; vessel glass; coins

**Liboni site 15 (Site 15015)**

Toponym: La Campana
 Coordinates: X: 2325038, Y: 4597199
 Location and method: The site, a presumable Roman bridge,
 is located on the Sbirro stream in the
 Campana area. It was revisited in 2005.
 Samples: -
 Finds 2004/2005: three large rectangular stone blocks
 Remarks: -
 Reference: Attema *et al.*, forthcoming a

**Liboni site 17 (Site 15017)**

Toponym: La Campana
 Coordinates: X: 2324019, Y: 4598562
 Location and method: The site is located directly east of the Armellino stream in the western part of the Campana area. It was revisited in 2005, but the area was covered with high corn plants; a number of paths through the field were explored; but no finds were collected
 Samples: -
 Finds 2004/2005: -
 Finds Liboni: lithic; impasto; depurated ware; African red slip ware
 Remarks: -
 Reference: Attema *et al.*, forthcoming a

**Liboni site 19 (Site 15019)**

Toponym: Torre del Monumento
 Coordinates: X: 2324570, Y: 4596439
 Location and method: The site is located west of the Loricina and south of the Sbirro stream, directly north of the burial monument known as *Torre del Monumento*. The site was revisited in both 2004 and 2005; on both occasions the area was fallow. A scatter of c. 0.17 ha was observed, but the site may well extend into the greenhouses to the north.
 Samples: grab samples (13 catalogued fragments)
 Finds 2004/2005: tile; *tesserae*; coarse ware; amphora; *terra sigillata*; African red slip ware
 Finds Liboni: painted plaster; *tesserae*; bucchero; coarse and depurated ware; amphora; fine ware; black glazed; *terra sigillata*; African red slip ware; lead; bronze; vessel glass
 Remarks: -
 Reference: Attema *et al.*, forthcoming a

**Liboni site 20 (Site 15020)**

Toponym:	Torre del Monumento
Coordinates:	X: 2324453. Y: 4596263
Location and method:	The site is located west of the Loricina and south of the Sbirro stream, directly south of the burial monument known as <i>Torre del Monumento</i> . The site was revisited in 2004 under low visibility circumstances. A scatter of some 0.21 ha was observed, but it may well extend into the overgrown and overbuilt areas to the southwest and west.
Samples:	grab sample (1 catalogued fragment)
Finds 2004/2005:	basalt pavement blocks; tuff and limestone debris; tile; coarse ware; amphora; dolium
Remarks:	The site was mapped by Liboni as part of a paved Roman road
Reference:	Attema <i>et al.</i> , forthcoming a

**Liboni site 29 (Site 15029)**

Toponym:	Pineta della Campana
Coordinates:	X: 2325743. Y: 4598566
Location and method:	The site is located west of the Quinto stream in the Campana area. The site was surveyed systematically in 2004 under low visibility conditions (ploughed but dusty). The main concentration (c. 0.16 ha) was in unit 1001, but there was also material in unit 1002. In 2005 the site was revisited.
Samples:	standard, grab and diagnostic samples (49 catalogued fragments)
Finds 2004/2005:	impasto (Archaic fabric?); limestone and tuff debris (partly in situ); tile; coarse and depurated ware; amphora; dolium; <i>terra sigillata</i> ; African red slip ware; vessel glass
Finds Liboni:	impasto; fine ware; <i>terra sigillata</i> ; African red slip ware; vessel glass; coin
Remarks:	-

**Liboni site 32 (Site 15032)**

Toponym:	La Campana
Coordinates:	X: 2325720. Y: 4598022
Location and method:	The site is located west of the Quinto stream in the Campana area. It was revisited in 2004 and surveyed systematically in 2005. On both occasions visibility was limited and only single artefacts were collected total and standard sample (no catalogued fragments)
Samples:	impasto
Finds 2004/2005:	impasto
Finds Liboni:	-
Remarks:	-
Reference:	Attema <i>et al.</i> , forthcoming a; Alessandri, 2007: 74

Liboni site 33 (Site 15033)

Toponym:	Piscina Cardillo
Coordinates:	X: 2326204. Y: 4597591
Location and method:	The site is located on a hill directly east of the Quinto stream. The site was revisited in 2004 under low visibility conditions (the area was covered with stubbles).
Samples:	Total sample (no catalogued fragments)
Finds 2004/2005:	impasto (Iron Age)
Find Liboni:	impasto
Remarks:	One catalogued coarse ware rim fragment (Net'04 L33/01/11) represents Roman off-site material
Reference:	Attema <i>et al.</i> , forthcoming a; Alessandri, 2007: 74

Liboni site 34 (Site 15034)

Toponym:	La Campana
Coordinates:	X: 2325638, Y: 4597324
Location and method:	The site is located in the fork between the Sbirro and Quinto streams in the Campana area. It was revisited in 2004 under low visibility conditions and surveyed systematically in 2005 under somewhat better visibility conditions. A small concentration (0.06 ha) was observed in units 4276/4277, with relatively high artefact densities in units 4278 and 4289 as well.
Samples:	standard and diagnostic samples (29 catalogued fragments)
Finds 2004/2005:	impasto (Archaic fabric); tile (probably post-archaic fabric); coarse and depurated ware; amphora; dolium; black glazed; basalt grinding stone fragment
Finds Liboni:	-
Remarks:	The site has been surveyed in more detail in 2008; the results are currently being elaborated by G. Tol for his PhD thesis.
Reference:	Attema <i>et al.</i> , forthcoming a

Fragment of a loom weight
Coarse ware
Rectangular loom weight with flattened sides and rounded edges; pierced hole in upper part connecting the two short sides; incised cross on top
2.5Y 8/2 pale yellow
H 9.3; L x W 6.1 x 3.0

Liboni site 36 (Site 15036)

Toponym: La Campana
Coordinates: X: 2324980. Y: 4597429
Location and method: The site is located on a hill directly north of the Sbirro stream in the Campana area. It was revisited in 2004 and surveyed systematically in 2005 under medium visibility conditions (the area lay fallow). The main concentration measured c. 0.73 ha in units 4065-4067 and 4073/4074, but surrounding units also had rather high artefact densities.
Samples: standard and diagnostic samples (162 catalogued fragments)
Finds 2004/2005: impasto; tuff debris; tile; terracotta "gutter"; *tesserae*; coarse and depurated ware (*a.o.* Archaic fabric); amphora; dolium (*a.o.* Archaic fabric); black glazed; *terra sigillata*; African red slip ware; iron
Finds Liboni: -
Remarks: -
Reference: Attema *et al.*, forthcoming a

Impasto

1. Net'05 4072/01/4

Base fragment
 Impasto
 Flat base, inside concave
 Exterior 2.5YR 4/6 red; interior 2.5YR 2.5/0 black; core 5YR 4/3 reddish brown
 H 3.3; L x W 3.6 x 3.0; T wall 1.3; T base 1.7; D 7

Tiles

2. Net'05 4057/01/2

Rim fragment of tile
 Coarse ware
 Rectangular profile with flattened internal and external angle, lip slightly levelled on the outside
 Exterior 5Y 8/2 pale yellow; interior 2.5Y 8/2 pale yellow
 Hrim 5.6; Tplate 2.5
 Not drawn

3. Net'05 4065/01/2

Rim fragment of a tile

Catalan Dressel 2-4 (late 1st century BC- end 2nd century AD)

50. Net*05 4066/03/8

Spike of an amphora
Coarse ware
Hollow cylindrical spike, lower side flattened to slightly convex
Exterior 5YR 6/6 reddish yellow; core 10R 5/6 red
H 5.5; Dspike 4.4
Not drawn

51. Net*05 4066/04/7

Base fragment of an amphora
Depurated ware
Hollow knobbed base, lower side flattened
7.5YR 7/6 reddish yellow
H 2.4; Twall 0.8; Dknob 4.8
Not drawn
De Haas *et al.*, 2008: 554, no. 54 and other knobbed fragments (2nd – early 1st century BC)

52. Net*05 4066/04/15

Rim fragment of an amphora
Coarse ware
Outcurving rim, thickened on the outside and undercut; corresponding groove on the inside; convex lip
H 3.4; Twall 0.9; Trim 2.0; D 16

53. Net*05 4067/02/1

Handle fragment of an amphora
Coarse ware
Vertical double bar handle, bars round in section
7.5YR 8/4 pink
H 7.0; Shandle 5.2 x 2.5
Not drawn
Italian Dressel 2-4 (70 BC - end 1st century AD)

54. Net*05 4067/02/2

Rim fragment of an amphora
Coarse ware (Catalan fabric)
Flaring wall; slightly outcurving rim; convex lip
Exterior/interior 2.5YR 6/8 reddish yellow
H 4.4; Twall 1.0; Trim 1.0; D 16
Catalan Dressel 2-4 (late 1st century BC- end 2nd century AD)

55. Net*05 4067/02/12

Handle fragment of an amphora
Coarse ware
Vertical band handle oval in section
Exterior 5YR 7/6 reddish yellow; core 2.5YR 7/8 light red
H 11.9; Shandle 4.1 x 2.6
Not drawn
De Haas *et al.*, 2008: 550, no. 34 (2nd – early 1st century BC)

56. Net*05 4067/02/14

Spike of an amphora
Coarse ware
Solid cylindrical spike, lower side flattened
Exterior 5YR 7/4 pink; interior 2.5YR 6/6 light red
H 11.5; D 4.5
Not drawn

57. Net*05 4067/02/15

Coarse ware
Rim fragment of an amphora
Triangular rim, undercut on the outside; convex lip
Exterior/interior 5YR 7/6 reddish yellow
H 3.9; Twall 0.7; Trim 2.2; D 19
Graeco-Italic or Dressel 1a (last quarter 3rd - mid 1st century BC)

58. Net*05 4072/01/1

Handle fragment of an amphora
Coarse ware (Catalan fabric)
Vertical double bar handle
2.5YR 5/8 red
H 9.0; Shandle 6.4 x 3.0
Catalan Dressel 2-4 (late 1st century BC- end 2nd century AD)

59. Net*05 4073/01/6

Spike of an amphora
Coarse ware (Campanian fabric)
Solid cylindrical spike with slightly concave sides, lower side flattened
2.5YR 6/8
H 7.9; D 6.5
Italian Dressel 1 or 2-4 (130 BC - end 1st century AD)

60. Net*05 4073/02/2

Handle fragment of an amphora
Coarse ware
Fragment of a vertical double-bar handle
2.5YR 6/8 red
L 7.6; 3.0 x 2.7
Not drawn
Dressel 2-4 (70 BC - end 1st century AD)

*Coarse and depurated wares***61. Net*04 L36/01/4**

Handle fragment
Depurated ware
Vertical band handle, oval in section with 2 ribs on the outside
Exterior 7.5YR 6/6 reddish yellow; core 7.5YR 6/6 reddish yellow
H 3.9; Shandle 2.6 x 0.9
Not drawn

62. Net*04 L36/01/D.S./11

Rim fragment of a pentola
Coarse ware
Flaring wall; outturning horizontal rim thickened on the outside, concave on top; convex lip
Exterior 7.5YR 5/2 brown; interior 2.5YR 6/8 light red; core 2.5YR 6/8 light red
H 2.1; Twall 0.7; Trim 0.8; D 22
Olcese, 2003: *pentola* type 2b (Claudian); figures 2.12-2.13

63. Net*05 4056/01/4

Base fragment
Depurated ware
Cylindrical base ring with flattened edge, outside convex, inside; flaring wall
10 YR 8/3 very pale brown
H 2.1; Twall 0.2; Tbase ring 0.6 Tbase 0.5; Dbase 8
Not drawn

*Glass***162. Net'04 L36/01/D.S./15**

Rim fragment of a cup

Glass

Flaring wall; straight rim with a groove on the outside; flattened lip
5 GY 7/2 greyish yellow green
H 1.4; Twall 0.2; D 8**Liboni site 38 (Site 15038)**

Toponym: La Campana

Coordinates: X: 2325720. Y: 4597108

Location and method: The site is located in the fork between the Sbirro and Quinto streams in the Campana area. The site was surveyed systematically in 2005 under good visibility conditions (the field was harrowed). A concentration was observed in unit 4268, but may extend into the wooded area to the south.

Samples: standard sample (1 catalogued fragment)
Finds 2004/2005: impasto; tile (probably post-archaic fabric); coarse and depurated ware; amphora

Finds Liboni: coarse ware; black glazed; African red slip ware; lead miniature amphorae

Remarks: -

Reference: Attema *et al.*, forthcoming a*Tiles***1. Net'05 4268/01/2**

Rim fragment of a tile

Liboni site 63 (Site 15063)

Toponym:	Cioccati
Coordinates:	X: 2323885. Y: 4595083
Location and method:	The site is located north of the Tinozzi stream in the Cioccati area. The site was revisited in 2005 under low visibility conditions (the field was overgrown).
Samples:	diagnostic sample (1 catalogued fragment)
Finds 2004/2005:	limestone debris; tile; marble; <i>tesserae</i> ; coarse ware
Finds Liboni:	Sarcophagus; coarse and depurated ware; amphora; black glazed; <i>terra sigillata</i> ; African red slip ware; oil lamp fragments; vessel glass; bronze
Remarks:	The site has been surveyed in more detail in 2008; the results are currently being elaborated by G. Tol for his PhD thesis.

**Site T3S1 (Site 15102)**

Toponym:	Scopone
Coordinates:	X: 2328734. Y: 4597558
Location and method:	The site is located just south of a now dry stream in the Scopone area. Levelling seems to have removed most of the relief in this area that was fallow at the time of systematic survey in 2005. Visibility was low, survey at full coverage showed a concentration of protohistoric material of c. 0.31 ha in units 2913/2916.
Samples:	diagnostic and total samples (33 catalogued fragments)
Finds 2004/2005:	impasto (including dolium and thin-walled pottery); protohistoric grey ware?; basalt whetstone
Remarks:	-
Reference:	Attema <i>et al.</i> , forthcoming a

**Site T1S9 (Site 15103)**

Toponym: Scopone
 Coordinates: X: 2328288, Y: 4596952
 Location and method: The site is located directly west of the Scopone stream. It was surveyed systematically in 2004 under medium visibility conditions (harrowed but dusty field); most finds were observed in a very small area (0.01 ha) in a ditch on the edge of the field in unit 1376.
 Samples: standard, total and grab samples (3 catalogued fragments)
 Finds 2004/2005: impasto
 Remarks: -
 Reference: Attema *et al.*, forthcoming a

*Impasto***1. Net'04 1376/01/1**

Decorated wall fragment
 Impasto
 Flaring wall, three encircling grooves on the outside
 Exterior/core 7.5YR 5/2 brown to 7.5YR 4/0 dark gray; interior 7.5YR 5/0 gray to 7.5YR 4.0 dark gray
 H 3.7; Twall 0.5 – 0.6

2. Net'04 1376/02/3

 Band handle, oval in section
 Exterior/interior 5YR 4/3 reddish brown to 5YR 5/3 reddish brown; interior/core 2.5YR 4/6 red to 5YR 4/6 yellowish red
 H 6.2; Shandle 3.7 x 2.9

**Site T2S3 (Site 15106)**

Toponym: Zucchetti
 Coordinates: X: 2324960, Y: 4595240
 Location and method: The site is located on a ridge west of the Loricina stream. The area was surveyed systematically in 2004 under medium visibility conditions (fallow field with some vegetation). A concentration of c. 0.31 ha was recorded in units 2227 and 2246.
 Samples: standard and diagnostic samples (56 catalogued fragments)
 Finds 2004/2005: limestone debris; tile (*a.o.* Archaic fabric); marble; coarse and depurated ware (*a.o.* Archaic fabric); amphora; dolium (*a.o.* Archaic fabric); black glazed; *terra sigillata*; African red slip ware; leucite-basalt grinding stone
 Remarks: The site has been surveyed in more detail in 2008; the results are currently being elaborated by G. Tol for his PhD thesis.
 Reference: Attema *et al.*, forthcoming a

*Stone***56. Net'04 2227/04/1**

Basalt
Grinding stone
Flat central part, sides curving upwards
10YR 7/1 light gray
L x W 14.5 x 15.4; T 4.5

**Site T2S4 (Site 15107)**

Toponym: Zucchetti
Coordinates: X: 2325345. Y: 4595126
Location and method: The site is located west of the Loricina stream. The area was surveyed systematically in 2004 under medium visibility conditions (harrowed field with vegetation). A concentration of c. 0.18 ha was observed in units 2249, 2258 and 2259, but it may extend further to the south.
Samples: standard and diagnostic samples (68 catalogued fragments)
Finds 2004/2005: limestone debris; tile; coarse and depurated ware; amphora; dolium (*a.o.* Archaic fabric); black glazed; *terra sigillata*; African red slip ware; vessel glass
Remarks: -
Reference: Attema *et al.*, forthcoming a

*Tiles***1. Net'04 2249/01/1**

Rim fragment of a tile
Coarse ware
Rectangular profile with rounded internal angle, flattened external angle; slightly convex lip
Exterior/interior 7.5YR 7/6 reddish yellow; core 5YR 7/6 reddish yellow
L x W 9.0 x 4.2; Hrim 6.5; Tplate 2.6
Not drawn

2. Net'04 2259/02/1

Rim fragment of a tile
Coarse ware
Rectangular profile with rounded exterior and interior angle; lip damaged
Exterior/interior 5YR 7/6 reddish yellow; core 5YR 6/6 reddish yellow
L x W 7.5 x 12.6; Hrim 5.9; Tplate 2.4
Not drawn

*Large storage and transport vessels***3. Net*04 2259/01/1**

Handle fragment of an amphora
 Depurated ware
 Vertical band handle, rounded in section with several grooves on the outside
 Exterior/interior 5YR 8/4 pink to 5YR 7/6 reddish yellow; core 5YR 7/6 reddish yellow
 H 10.7; Shandle 2.8 x 2.7
 Not drawn

4. Net*04 2259/02/2

Spike of amphora
 Coarse ware
 Solid cylindrical spike, lower side pointed

Site T2S5 (Site 15108)

Toponym: Spino Bianco/La Fossa
Coordinates: X: 2325632. Y: 4595400
Location and method: The site is located east of the Loricina stream. The area was surveyed systematically in 2004 under good visibility conditions (harrowed field, no vegetation). A concentration of c. 0.29 ha was mapped in unit 2301, extending slightly into surrounding units (*a.o.* 2299, 2300). The site was revisited later that year and in 2005.
Samples: Standard, diagnostic and total samples (37 catalogued fragments)
Finds 2004/2005: impasto (*a.o.* *impasto rosso*); *bucchero*; limestone debris; tile (*a.o.* Archaic fabric; probably post-archaic fabric); coarse and depurated ware (*a.o.* Archaic fabric); amphora; dolium (*a.o.* Archaic fabric); black glazed; *terra sigillata*

Toponym:	La Campana
Coordinates:	X: 2325034. Y: 4597238
Location and method:	The site is located on the Sbirro stream in the Campana area. Part of it was surveyed systematically in 2004 under adverse visibility conditions (much vegetation). A very dense concentration of building debris was observed in units 1103 and 1104, but the site definitely continues to the northwest.
Samples:	standard samples (4 catalogued fragments)
Findings 2004/2005:	tuff and limestone building debris (<i>a.o.</i> tuff squared blocks and limestone <i>reticulatum</i> stones); in situ <i>opus reticulatum</i> wall; tile; brick; coarse and depurated ware; amphora; <i>terra sigillata</i> ; African red slip ware
Remarks:	amounts of pottery are very low, perhaps indicating use as an outbuilding rather than habitation
Reference:	Attema <i>et al.</i> , forthcoming a

Tiles

1. Net'04 1104/01/1

Fragment of a stamped tile
Coarse ware
Flat plate with on top a worn circular stamp with a row of dots around its edge
Exterior 10YR 8/3 very pale brown; core 10YR 7/3 very pale brown
L x W 13.1 x 12.1; Tplate 3.6; Dstamp 6
Stamp type is of Imperial date

Coarse and depurated wares

2. Net'04 1103/03/1

Rim fragment of a jar
Coarse ware
Outcurving rim, thickened on the outside; convex lip
Exterior/interior 5YR 7/6 reddish yellow to 5YR 6/6 reddish yellow; core 10YR 6/3 pale brown
H 1.9; Twall 1.4; Trim 2.1; D ?

Fine wares

3. Net'04 1104/02/1

Rim fragment of a dish
Terra sigillata
Straight rim slightly thickened on the outside and undercut, on the inside a groove; convex lip
Exterior/interior 2.5YR 4/8 red; core 5YR 8/4 pink
H 1.6; Twall 0.4; Trim 0.4; D ?
CFTS 1990: form 3 (AD 50 – 100)

4. Net'04 1103/02/1

Rim fragment
African red slip ware
Upright rim thickened on the inside and outside; grooved lip
2.5YR 6/8 light red
H 1.9; Twall 0.7; Trim 0.7; D ?
Not drawn

Site T1S4/020503 (Site 15111)

Toponym:	La Campana
Coordinates:	X: 2325094. Y: 4597358
Location and method:	The site is located on a hill slope directly north of the Sbirro stream in the Campana area. The site was surveyed systematically in 2005 under adverse visibility conditions (ploughed but very dusty). It consists of a scatter of c. 0.35 ha in units 4053/4054 with much material in surrounding units (1097, 4039/4040 and 4055) as well.
Samples:	standard and diagnostic samples (104 catalogued fragments)
Finds 2004/2005:	impasto; limestone and tuff debris; tile; brick; marble; <i>tesserae</i> ; coarse and depurated ware (<i>a.o.</i> Archaic fabric); amphora; dolium (<i>a.o.</i> Archaic fabric); <i>terra sigillata</i> ; African red slip ware; vessel glass; lead; bronze; iron
Remarks:	as the area slopes down considerably, part of the scatter may well be the result of slope wash
Reference:	Attema <i>et al.</i> , forthcoming a

Impasto

1. Net'05 4040/04/1

Decorated wall fragment
Impasto
Flaring wall with several horizontal lines of incised patterns on the outside
7YR 4/1 dark grey
L x W 2.6 x 2.7; Twall 0.5

Tiles

2. Net'05 4039/03/2

Rim fragment of a tile
Coarse ware
Rectangular profile with flattened external angle, rounded internal angle; lip flattened
5YR 7/6 reddish yellow
L x W 14.0 x 7.; Hrim 5.0; Tplate 2.5
Not drawn

3. Net'05 4053/01/3

Rim fragment of a tile
Coarse ware
Rectangular profile with rounded internal and external angle, lip bevelled on the inside
Exterior 7.5YR 8/1 white; core 7.5YR 7/4 pink
Hrim 6.1; Tplate 2.6
Not drawn

4. Net'05 4053/02/1

Rim fragment of a tile
Coarse ware
Rectangular profile with rounded internal angle, flattened external angle; lip flattened
5YR 7/4 pink
Hrim 7.0; Tplate 2.5
Not drawn

Large storage and transport vessels

5. Net'05 4039/02/1

**Site T2S1 (Site 15114)**

Toponym: Padiglione
Coordinates: X: 2322917 Y: 4598901
Location and method: The site is located west of the Armellino stream just east of present-day Padiglione. The site was partly surveyed systematically in 2004 under very low visibility conditions (much vegetation). A small concentration of c. 0.08 ha was observed in unit 1919, but a diagnostic sample taken c. 30 m to the east (unit 2020) indicates that the site is probably larger.
Samples: standard and diagnostic samples (39 catalogued fragments)
Finds 2004/2005: impasto; limestone and travertine building debris; tile; coarse and depurated ware; amphora; African red slip ware; vessel glass
Remarks: -
Reference: Attema *et al.*, forthcoming a

Site 0205-14 (Site 15126)

Toponym: Depuratore
 Coordinates: X: 2326558, Y: 4591910
 Location and method: The site is located on the coast, just west of the town of Nettuno on the edge of the military base. The site was visited in 2005; on the terrain of a water plant, we observed Roman ceramics in a section.
 Samples: grab sample (3 catalogued fragments)
 Finds 2004/2005: tile; coarse and depurated ware; amphora
 Remarks: -
 Reference: Attema *et al.*, forthcoming a

Tiles

1. Net'05 0205/14/3

Rim fragment of a tile
 Coarse ware
 Rectangular profile with rounded internal angle, bevelled external angle; lip slightly bevelled on the outside
 10 YR 8/3 very pale brown

 Coarse ware
 Spreading wall; straight rim thickened on the inside and outside; convex lip
 7.5YR 7/6 reddish yellow
 H 2.3; Twall 0.5; Trim 1.1; D 18

Site 020501 (Site 15127)

Toponym: La Campana
 Coordinates: X: 2325146, Y: 4597449
 Location and method: The site is located on a hill slope north of the Sbirro stream in the Campana area. The site was surveyed systematically in 2005 under medium visibility conditions (ploughed but dusty and very sunny). It consists of a very small (0.03 ha) but dense concentration of mainly building debris in unit 4040.
 Samples: standard sample (2 catalogued fragments)
 Finds 2004/2005: tuff debris; tile; amphora; African red slip ware
 Remarks: site 15127. a small concentration with a limited pottery assemblage, probably represents an outbuilding
 Reference: Attema *et al.*, forthcoming a

Fine wares

1. Net'05 4040/01/1

Rim fragment of a dish

2. Net'05 4040/01/2

Rim fragment of a casserole
 African red slip ware
 Slightly flaring wall; straight rim thickened on the inside and undercut; convex to pointed lip
 Slip 2.5YR 6/8 light red; core 5YR 7/8 reddish yellow
 H 4.4; Twall 0.5; Trim 0.8 ; D 29
 Hayes, 1972: form 23b (2nd - 4th century AD); figure 1.16

**Site 0205-02 (Site 15128)**

Toponym: La Campana
 Coordinates: X: 2325137. Y: 4597708
 Location and method: The site is located in the fork between the Sbirro and Quinto streams in the Campana area, just northwest of site 15014. It was surveyed systematically in 2005 under medium visibility conditions (ploughed but dusty and very sunny). It consists of a small (0.08 ha) but dense concentration in units 4031 and 4032.
 Samples: standard samples (3 catalogued fragments)
 Finds 2004/2005: tile; coarse and depurated ware; amphora; dolium;
 Remarks: unit 4032 also yielded African red slip wares, but these probably stem from site 15014; site 15128, being a small concentration with a limited pottery assemblage, probably represents an outbuilding.
 Reference: Attema *et al.*, forthcoming a

*Coarse and depurated wares***1. Net'05 4031/01/1**

Straight rim thickened on the outside and undercut; convex lip

Exterior 5YR 4/4 reddish brown; interior 2.5YR 5/8 red; core 5YR 5/3 reddish brown

H 1.6; Twall 0.6; Trim 0.9; D 20

Site 0205-07 (Site 15130)

Toponym:	La Campana
Coordinates:	X: 2324948, Y: 4597588
Location and method:	The site is located north of the Sbirro stream in the Campana area. The area was surveyed systematically in 2005 under medium visibility conditions (ploughed but dusty). On this occasion modest amounts of impasto were found in the wider area. On a revisit later that year rain had considerably improved visibility conditions; at least two small concentrations (together c. 0.03 ha) were observed in units 4062, 4064 and 4070.
Samples:	standard and total samples (5 catalogued fragments)
Finds 2004/2005:	plain and burnished impasto; dolium (Archaic fabric)
Remarks:	area also contains Roman off-site material (diagnostics are presented in the off-site section of this catalogue)
Reference:	Attema <i>et al.</i> , forthcoming a

*Impasto***1. Net'05 4062/02/1**

Rim fragment of a bowl

Impasto

Flaring wall; slightly incurving rim; convex lip

Exterior/interior 5YR 5/4 reddish brown; core 5YR 3/2 dark reddish brown

H 1.9; Twall 0.5; D 10

2. Net'05 4062/02/2

Rim fragment of a bowl

Impasto

Spreading wall; straight, irregular shaped rim; convex lip

Exterior 5YR 5/3 reddish brown; interior 5YR 4/3 reddish brown; core 5YR 2.5/2 dark reddish brown

H 3.2; Twall 1.2; D 30

3. Net'05 4070/01/1

Rim fragment of a bowl

Impasto

Upright rim; convex lip

Exterior/interior 7.5YR 4/2 brown/dark brown; core 7.5YR 2/0 black

H 2.4; Trim 0.8; D 20

**Site 0205-09 (Site 15132)**

Toponym: La Campana
Coordinates: X: 2325151. Y: 4597510
Location and method: The site is located in the fork between the Sbirro and Quinto streams in the Campana area, south of site 15014. It was surveyed systematically in 2005 under medium to good visibility conditions (ploughed but dusty and partly very sunny). A small but dense concentration of c. 0.04 ha was observed in units 4035 and 4042.
Samples: standard samples (2 catalogued fragments)
Finds 2004/2005: tuff debris; cement; tile; coarse and depurated ware; amphora; *terra sigillata*; African red slip ware
Remarks: the coarse and fine wares only occur in very small amounts compared to the amphora; site 15132, being a small concentration with this specific pottery assemblage, probably represents an outbuilding; a single *tessera* from the area does not seem to be part of the site's assemblage
Reference: Attema *et al.*, forthcoming a

*Fine wares***1. Net'05 4042/01/1**

Rim fragment of a lid
 African red slip ware
 Flaring wall; straight rim thickened on the outside; convex lip

 Hayes, 1972: form 196 (2nd - mid 3rd century AD);
 figures 1.38-1.39

*Glazed wares***2. Net'05 4042/01/2**

Rim fragment of a lid
 Glazed ware
 Irregular straight wall; convex to slightly flattened lip
 Exterior 5YR 3/4 dark reddish brown
 H 1.6; Trim 0.8; D 11

**Site 0205-12 (Site 15134)**

Toponym: La Campana
Coordinates: X: 2325608, Y: 4597532
Location and method: The site is located west of the Quinto stream in the Campana area. It was surveyed systematically in 2005 under medium visibility conditions (harrowed with fair amount of vegetation). A concentration of c. 0.46 ha was mapped in units 4283 and 4284.
Samples: standard samples (no catalogued fragments)
Finds 2004/2005: impasto (Late Iron Age); coarse and depurated ware (Archaic fabric)
Remarks: -
Reference: Attema *et al.*, forthcoming a

Site 2726 (Site 15135)

Toponym: Piscina Cardillo
 Coordinates: X: 2325998, Y: 4596723
 Location and method: The site is located east of the Quinto stream in the Piscina Cardillo area. It was surveyed systematically in 2005 under low visibility conditions (ploughed but dusty and very sunny). A very small (less than 0.01 ha) concentration was observed in unit 2726.
 Samples: standard and total sample (no catalogued fragments)
 Finds 2004/2005: impasto; hut loam; dolium (Archaic fabric)
 Remarks: -
 Reference: Attema *et al.*, forthcoming a

Site 2733 (Site 15136)

Toponym: Piscina Cardillo
 Coordinates: X: 2326195, Y: 4596825
 Location and method: The site is located east of the Quinto stream in the area of Piscina Cardillo. It was surveyed systematically in 2005 under low visibility conditions (much vegetation). A concentration of c. 0.05 ha was observed in unit 2733, but it may extend further to the north.
 Samples: standard sample (no catalogued fragments)
 Finds 2004/2005: impasto; tile; coarse and deperated ware; amphora; black glazed
 Remarks: -
 Reference: Attema *et al.*, forthcoming a

**Site 2793 (Site 15137)**

Toponym: Campo Cerreto
 Coordinates: X: 2326395. Y: 4596503
 Location and method: The site is located east of the Quinto stream in the Campo Cerreto area. It was surveyed systematically in 2005 under very low visibility conditions (much vegetation). A small (0.06 ha) concentration was observed in unit 2793, but it may extend further to the west.
 Samples: standard and total sample (no catalogued fragments)
 Finds 2004/2005: impasto (Archaic fabric); tile (possibly Archaic fabric)
 Remarks: -
 Reference: Attema *et al.*, forthcoming a

**Site 2821-2823 (Site 15138)**

Toponym: Rovito
 Coordinates: X: 2326745. Y: 4596910
 Location and method: The site is located east of the Quinto stream in the Rovito area. It was surveyed systematically in 2005 under low visibility conditions (stubble field). Units 2821-2823 contained a concentration of some 0.11 ha that may extend further to the northwest.
 Samples: standard and diagnostic samples (25 catalogued fragments)
 Finds 2004/2005: tile (one fragment misfired); coarse and depurated ware; dolium (*a.o.* Archaic fabric); black glazed; *terra sigillata*; African red slip ware
 Remarks: -
 Reference: Attema *et al.*, forthcoming a

**Site 2885 (Site 15139)**

Toponym:	Tre Cancelli
Coordinates:	X: 2328524. Y: 4595564
Location and method:	The site is located east of the Scopone stream, west of present-day Tre Cancelli. It was surveyed systematically in 2005 under low visibility conditions (much vegetation). A concentration of c. 0.07 ha was mapped in unit 2885, with some additional material in unit 2886.
Samples:	standard and total samples (no catalogued fragments)
Finds 2004/2005:	plain and burnished impasto
Remarks:	-
Reference:	Attema <i>et al.</i> , forthcoming a

Site 2906 (Site 15140)

Toponym:	Piscina Cardillo
Coordinates:	X: 2328741. Y: 4595787
Location and method:	The site is located east of the Scopone stream, northwest of present-day Tre Cancelli. It was surveyed systematically in 2005 under medium visibility conditions (harrowed with some vegetation). A small concentration (0.01 ha) was observed in unit 2906
Samples:	standard and total sample (3 catalogued fragments)
Finds 2004/2005:	plain and burnished impasto
Remarks:	-
Reference:	Attema <i>et al.</i> , forthcoming a

Impasto

1. Net 05 2906/01/1

Rim fragment of a carenated bowl
 Impasto
 Spreading wall; convex carena; slightly outcurving rim; convex lip
 Exterior 5YR 4/3 reddish brown; interior 5YR 5/3 reddish brown; core 5YR 4/6 yellowish red
 H 1.9; Twall 0.35; Trim 0.35; D 10

2. Net 05 2906/02/1

Handle fragment
 Impasto
 Vertical band handle oval in section
 Exterior/interior 10YR 4/2 dark greyish brown; core 5YR 4/6 yellowish red
 H 3.0; Shandle 2.2 x 0.7
 Not drawn

3. Net 05 2906/02/2

Carenated wall fragment
 Impasto
 Rounded carena thickened on the outside, rather sharp angle on the inside
 Exterior/interior 5YR 5/3 reddish brown; core 7.5YR N4/0 dark grey
 L x W 2.4 x 2.9; Twall 0.6; Tcarena 0.8
 Not drawn

Site 4557 (Site 15146)

Toponym:	Quarto del Cerrone
Coordinates:	X: 2332201. Y: 4595573
Location and method:	The site is located west of the Astura river, on a ridge overlooking the river valley in the Quarto del Cerrone area. It was surveyed systematically in 2005 under medium visibility conditions (ploughed but dusty). Unit 4657 contained a concentration of artefacts of c. 0.03 ha.
Samples:	standard and diagnostic samples (3 catalogued fragments)
Finds 2004/2005:	tile (<i>a.o.</i> Archaic fabric; probably post-archaic fabric); coarse and depurated ware; amphora; dolium (<i>a.o.</i> archaic fabric); black glazed
Remarks:	The site may be (part of) Piccarreta's site 93, although this site is located c. 125 further to the southwest.

Tiles

1. Net 05 4557/03/1

Rim fragment of a tile
 Coarse ware
 Rectangular profile with rounded internal and external angle; lip flattened
 Exterior 2.5Y 8/4 pale yellow; core 10YR 6/6 brownish yellow
 L x W 5.5 x 4.1; Hrim 5.1; Tplate 2.0
 Not drawn

2. Net 05 4557/03/2

Rim fragment of a tile
 Coarse ware
 Rectangular profile with rounded internal angle and flattened external angle; lip flattened
 Exterior 7.5YR 8/4 pink; core 5YR 7/4 pink
 L x W 7.2 x 5.5; Hrim 4.9; Tplate 1.6
 Not drawn

3. Net'05 4557/03/3

Rim fragment of a tile

Coarse ware (red augite)

Rectangular profile with rounded internal and external angle; lip flattened

Exterior 2.5YR 5/6 red; core 2.5YR 4/4 reddish brown

L x W 10.2 x 4.8; Hrim 4.5; Tplate 1.4

Not drawn

**Site 4678 (Site 15148)**

Toponym:	Quarto del Cerrone
Coordinates:	X: 2331677. Y: 4595206
Location and method:	The site is located west of the Astura river in the Quarto del Cerrone area. It was surveyed systematically in 2005 under low visibility conditions (harrowed but very dusty). A concentration of 0.67 ha was mapped in unit 4678.
Samples:	standard sample (no catalogued fragments)
Finds 2004/2005:	tile (<i>a.o.</i> Archaic fabric; probably post-archaic fabric); tile wasters; coarse and depurated ware (Archaic fabric); amphora; black glazed
Remarks:	the scatter was rather diffuse
Reference:	-

Site 4717 (Site 15149)

Toponym:	Quarto del Cerrone
Coordinates:	X: 2330927. Y: 4595636
Location and method:	The site is located north of the Cinfonare stream in the Quarto del Cerrone area. It was surveyed systematically in 2005 under low visibility conditions (the area lay fallow and was dusty). Unit 4717 had relatively high artefact densities, although the scatter was not clearly delimited.
Samples:	standard samples (no catalogued fragments)
Finds 2004/2005:	tile; tile wasters; depurated wares; amphora; dolium
Remarks:	-
Reference:	-

Villa Verdiana (Site 15150)

Toponym:	Scopone
Coordinates:	X: 2328974. Y: 4596990
Location and method:	The site is located west of the Cinfonare stream in the Scopone area. It was pointed out to us by the landowner in whose garden the site is located. The landowner had collected a ceramic sample on the site; in 2005 the area was investigated by magnetometer survey.
Samples:	grab sample (44 catalogued fragments)
Finds 2004/2005:	tile; coarse and depurated ware (<i>a.o.</i> Archaic fabric); amphora; dolium (<i>a.o.</i> Archaic fabric); black glazed; <i>terra sigillata</i> ; African red slip ware; vessel glass
Remarks:	the magnetometer survey revealed the subsurface traces of several walls
Reference:	Attema <i>et al.</i> , forthcoming a

Large storage and transport vessels

1. Net'05 V.V./23

Handle fragment of an amphora
Coarse ware
Vertical band handle, oval in section with a deep groove on the outside
5YR 7/3 pink
H 4.7; Shandle 4.6 x 2.6
Not drawn

2. Net'05 V.V./52

Rim fragment of an amphora
Coarse ware
Outcurving rim, thickened on the outside and undercut, inside somewhat irregular; convex lip, thickened on the outside
Exterior 5YR 4/2 dark reddish grey; interior 5YR 5/6 yellowish red; core 2.5YR 5/8 red
H 6.0; Twall 1.0; Trim 2.5; D 18
Tripolitana 2 (2nd - first half 3rd century AD)

*Coarse and depurated wares***3. Net'05 V.V./7**

Rim fragment of a jar
Coarse ware
Outturning rim, thickened on the outside, inside concave; convex lip
Exterior 5YR 4/6 yellowish red; interior 5YR 5/6 yellowish red; core 2.5YR 5/6 red
H 4.5; Trim 0.6; D 15
Olcese, 2003: *olla* type 7 (late Republican – Flavian); figures 2.7-2.8

4. Net'05 V.V./9

Base fragment
Depurated ware
Concave base with slightly thickened edge and encircling groove on the outside, inside concave
Exterior 2.5YR 5/8 red; interior 2.5YR 5/6 red; core 2.5YR 5/8 red
L x W 4.7 x 3.3; H 1.6; Twall 0.45; Tbase 0.4; Dbase 6.5
Not drawn

5. Net'05 V.V./12

Rim fragment
Coarse ware
Outcurving rim; lip somewhat bevelled on the outside
Exterior 5YR 4/1 dark grey; interior 5YR 5/3 reddish brown; core 2.5YR 5/6 red
H 3.6; Trim 1.0; D 22

6. Net'05 V.V./15

Rim fragment of a jar
Depurated ware
Flaring wall, ribbed on the inside; outcurving rim thickened on the outside; convex lip
Exterior 5YR 4/1 dark grey; interior 2.5YR 6/6 light red; core 2.5YR 5/8 red
H 3.8; Twall 0.4; Trim 0.6; D 19

7. Net'05 V.V./22

Rim fragment of a pentola
Coarse ware
Flaring wall; outturning rim, transition to wall thickened on the inside; convex lip
Exterior/core 2.5YR 5/6 red; interior 2.5YR 4/8 red
H 5.6; Twall 0.5; Trim 0.8 ; D 28

8. Net'05 V.V./24

Knob of a lid
Coarse ware
Cylindrical knob with flattened edge, concave top; straight wall with a ridge on the transition to the knob
Exterior/interior 7.5YR7/2 pinkish grey; core 5YR 7/3 pink
L x W 3.5 x 2.7; Twall 0.5; Dknob 3.5

Rim fragment of a jar
Coarse ware
Flaring wall; outcurving rim thickened on the outside and undercut; convex lip
Exterior 2.5YR 6/6 light red; interior/core 2.5YR 5/8 red
H 6.1; Twall 0.5; Trim 1.5; D 24
Olcese, 2003: *olla* type 3a (2nd century BC - Augustean); figures 2.5-2.6

10. Net'05 V.V./30

Base fragment
Depurated ware
Flaring base ring, outside convex, inside concave with two encircling grooves
10YR 7/3 very pale brown
L x W 4.3 x 4.1; H 1.7; Twall 0.6; Tbase 0.6; Dbase 4.5
Not drawn

11. Net'05 V.V./31a&b

Rim fragment of a jar?
Coarse ware
Outcurving rim thickened on the inside and outside and with three horizontal bands of incised motives on the outside; a strong ridge on the outside and a corresponding concave part on the inside; flattened lip
Exterior/interior 5YR 5/6 yellowish red; core 7.5YR 5/0 grey/dark grey
H 12.0; Twall 0.9; Trim 2.0 ; D 24
Modern?

12. Net'05 V.V./33

Base fragment
White-slipped ware
Flaring base ring with convex, thickened edge and undercut; outside base convex, inside concave; flaring wall
Slip 5YR 7/1 light grey; core 5YR 8/1 pinkish grey
H 5.2; L x W 4.3 x 3.4; Twall 0.7; Tbase 0.4; Dbase 4

13. Net'05 V.V./39

Handle fragment
Depurated ware
Vertical ribbed band handle, flattened in section
Exterior 2.5YR 6/6 light red; core 2.5YR 5/4 reddish brown
H 3.9; Shandle 2.5 x 0.8
Not drawn

14. Net'05 V.V./44

Knob fragment of a lid
Coarse ware
Cylindrical knob with rounded edges, flattened top
Exterior 5YR 6/4 light reddish brown; interior 5YR 5/3 reddish brown; core 5YR 4/2 dark reddish grey
H 2.2; Twall 0.7; Dknob 2.3
Not drawn

15. Net'05 V.V./45

Flanged wall fragment of a teglia
Archaic coarse ware
Large horizontal flange, edge bevelled on the inside and thickened on the outside
Exterior 2.5YR 4/4 reddish brown; interior 5YR 4/4 reddish brown; core 2.5YR 4/6 red
H 7.9; L x W 5.7 x 4.3; Twall 1.1; Tflange 1.3 - 1.8; D 40
Bouma, 1996: Plate CVI, nr T11: 440/30 – 375 BC

16. Net'05 V.V./46

Rim fragment of a pentola
Coarse ware
Outturning rim slightly thickened on the outside, transition to wall thickened; flattened lip
Exterior 7.5YR 5/4 brown; interior/core 5YR 6/6 reddish yellow
H 8.1; Twall 0.85; Trim 1.1; D 34
Olcese, 2003: *pentola* type 4 (1st - mid 2nd century AD); figure 2.16

17. Net'05 V.V./49

Rim fragment of a jar
Coarse ware
Outcurving rim, transition to wall thickened on the inside; convex lip
Exterior 5YR 3/1 very dark grey; interior 5YR 5/6 yellowish red; core 5YR 5/3 reddish brown
H 2.6; Trim 0.7; D 13

18. Net'05 V.V./56

Rim fragment of a jar
Coarse ware
Outcurving rim thickened on the outside and undercut; convex lip

H 4.; L x W 4.0 x 0.9; Dknob 2.7
Not drawn

*Fine wares***22. Net'05 V.V./71**

Base fragment
Black glazed
Flaring base ring with tapering edge, inside concave, outside flat; on the inside two, on the outside one encircling groove
Core 7.5YR 7/4 pink; glaze 7.5YR 2/0 black
L x W 3.6 x 7.8; H 2.3; Twall 0.6; Tbase ring 1.7; Tbase 1.0; Dbase 9
Not drawn

23. Net'05 V.V./72

Stamped base fragment
Black glazed
Flaring base ring with convex edge, inside concave, outside flat; single stamp on the inside of the base, depicting an eight petalled rosette, with each leaf separated from the other by a line
Glaze 2.5YR 4/0 dark grey; core 7.5YR 7/4 pink
H 8.4; Twall 0.6; Tbase ring 1.5; Tbase 1.1; Dbase 4.5
Bernardini, 1986: stamp type 25 (*atelier des petites estampilles*, 3rd century BC)

24. Net'05 V.V./74

Rim fragment of a bowl
Black glazed
Spreading wall; slightly outcurving rim; convex lip
Glaze 2.5YR 3/0 very dark grey; core 2.5YR 5/2 weak red
H 2.6; Trim 0.7; D ?

25. Net'05 V.V./2

Stamped base fragment
Terra sigillata
Flaring base ring with tapering edge; inside concave, outside flat with convex centre; flaring wall; on the centre of the floor an stamp depicting a cross
Slip 2.5YR 4/6 red; core 5YR 7/4 pink
H 4.3; Twall 0.4; Tbase ring 1.5; Tbase 0.5; Dbase 5
Oxé *et al.*, 2000: 2549-5: unknown date

26. Net'05 V.V./3

Decorated wall fragment
Terra sigillata
Flaring wall with on the outside plastic decoration depicting a human figure and a dog, flanked on the left by several vegetal motives and, below, by a line of dots
Slip 10R 4/8 red; core 10R 5/6 red
L x W 2.6 x 3.5; Twall 0.4

27. Net'05 V.V./21

Base fragment
Terra sigillata
Cylindrical base ring with tapering edge, inside concave; groove on the outside above the base ring
Slip 10R 4/8 red; core 2.5YR 6/6 light red
H 1.9; Twall 0.5; Tbase ring 1.4; Dbase 6
Not drawn

28. Net'05 V.V./68

Base fragment
Terra sigillata
Cylindrical base ring with convex edge, outside and inside flat
Slip 10R 4/8 red; core 5YR 7/4 pink
L x W 6.5 x 6.4; H 2.8; Twall 0.9; Tbase ring 2.5; Tbase 1.8; Dbase 3.6
Not drawn

29. Net'05 V.V./4

Rim fragment of a bowl
African red slip ware
Flaring wall; straight rim thickened on the outside with two horizontal grooves; convex lip
Exterior/interior 2.5YR 5/8 red; core 2.5YR 5/6 red
H 5.4; Twall 0.5; Trim 0.7 ; D 19
Hayes, 1972: form 9b (second half 2nd century AD); figure 1.10

 Spreading wall; straight rim slightly thickened on the inside and
 outside; convex lip
 Exterior/interior 2.5YR 6/8 light red; core 2.5YR 5/2 weak red
 H 2.8; Trim 0.8; D 29
 Hayes, 1972: form 196 (2nd - mid 3rd century AD); figures 1.38-1.39

71. Net*05 4041/01/2

Base fragment of a *tegame*
 Coarse ware
 Flat base, inside flat; spreading wall; probably outturning horizontal
 rim; lip broken off
 Exterior 5YR 7/8 reddish yellow; interior 5YR 6/8 reddish yellow
 H 5.3; Tbase 1.0; D 22
 Olcese, 2003: *tegame* type 7 (2nd century BC - third quarter 1st century
 AD)

72. Net*05 4043/01/1

Rim fragment of a cup
 Depurated ware
 Spreading wall, inside ribbed; straight rim, thickened on the outside
 and undercut, on the inside a corresponding groove; convex lip
 5YR 6/6 reddish yellow
 H 3.3; Twall 0.6; Trim 0.6; D 8

73. Net*05 4043/01/2

Rim fragment of a jar
 Coarse ware
 Outcurving rim, with on the outside a plain cord decoration; convex lip
 10YR 8/2 very pale brown
 H 6.2; Twall 1.1; Tcord 1.8; Trim 1.4; D 24
 Fragment is very worn

74. Net*05 4045/01/1

Rim fragment of a lid
 Coarse ware
 Straight rim thickened on the outside; convex lip
 5YR 7/8 reddish yellow
 H 1.2; Twall 0.9; Trim 1.1; D 28
 Very worn

75. Net*05 4045/01/14

Handle fragment, probably of a small jug
 Coarse ware
 Vertical band handle oval in section with two grooves on the outside
 5YR 6/6 reddish yellow
 H 1.5; Shandle 1.1 x 0.5
 Not drawn

76. Net*05 4046/01/1

Handle fragment
 Depurated ware
 Vertical band handle with central groove on the outside
 2.5YR 6/8 light red
 H 3.0; Shandle 4.0 x 0.9
 Not drawn; related to site 15128?

77. Net*05 4046/01/2

Rim fragment of an amphora
 Coarse ware
 Outcurving rim thickened on the outside and undercut; convex lip,
 thickened on the inside and outside
 5YR 6/8 reddish yellow
 H 4.0; Trim 2.0; D 15
 Tripolitana 1 (Augustean – mid 2nd century AD)
 Related to site 15128?

78. Net*05 4046/02/1

Rim fragment of a bowl
 Glass
 Spreading wall; straight rim thickened on the outside and
 undercut; convex lip
 2.5Y 5/2 greyish brown
 H 1.3; Twall 0.1; Trim 0.4 D 18
 The rim is hollow from the folding of the glass

79. Net*05 4059/01/1

Rim fragment of a cup
 Red-slipped ware
 Spreading wall; upright rim, angular transition into wall marked on the
 outside by a ridge; convex lip
 Exterior 2.5YR 5/6 red to 2.5YR 7/4 pale red; interior 2.5YR 5/6
 red to 2.5YR 6/1 reddish grey; core 2.5YR 7/4 pale red to 2.5YR 6/1
 reddish grey
 H 1.8; Trim 0.4; D 8
 In shape resembles *Atlante* I 1981, TAV.XVII, nr.4: Çandarlı ware,
 Form L15: AD 50 – 100. However, distribution of this ware makes this
 parallel uncertain.

80. Net*05 4060/01/1

Spike of an amphora
Coarse ware
Solid cylindrical spike, lower side flattened to slightly pointed
7.5YR 7/6 reddish yellow
H 6.2; D 4.3
Not drawn

81. Net*05 4060/01/2

Rim fragment of an amphora
Coarse ware
Straight rim thickened on the outside; lip missing
Exterior/interior 5YR 7/4 pink; core 2.5YR 6/4 light reddish brown
H 3.1; Twall 1.0; Trim 2.2; Drim 13
Dressel 1b (75 BC - 0)
Not drawn

82. Net*05 4060/01/3

Handle fragment
Coarse ware
Vertical ring handle, oval in section
Exterior 2.5YR 6/6 light red; core 5YR 7/4 pink
H 3.9; Shandle 1.9 x 0.9
Not drawn

83. Net*05 4060/01/3a

Rim fragment of a jar
Coarse ware
Outcurving rim, thickened on the outside and undercut; convex lip
5YR 6/8 reddish yellow to 5YR 6/6 reddish yellow to 5YR 4/1 dark grey
H 2.8; Trim 1.4; D 30
Olcese, 2003: *olla* type 3a (2nd century BC - Augustean); figures 2.5-2.6

84. Net*05 4060/01/4

Rim fragment of amphora
Coarse ware (Catalan fabric)
Straight rim thickened on the outside with a smaller ridge below; convex lip
2.5YR 6/8 light red; coating 5YR 7/2 pinkish grey
H 3.6; Trim 2.1; D 16
Catalan Dressel 2-4 (late 1st century BC- end 2nd century AD)

85. Net*05 4060/01/5

Base fragment
Terra sigillata
Flaring base ring with pointed edge, groove on the outside; inside base flat
Slip 2.5YR 4/8 red; core 5YR 7/6 reddish yellow
H 4.6; L x W 2.9 x 4.2; D 5.5

86. Net*05 4061/01/1

Rim fragment of a cup
Thin-walled ware
Outturning rim; convex lip
Exterior 5YR 5/3 reddish brown; interior 5YR 4/3 reddish brown; core 5YR 2.5/2 dark reddish brown
H 1.9; Twall 0.35; Trim 0.6; D 12
Burnished on both sides

87. Net*05 4061/01/2

Rim fragment of an amphora
Coarse ware
Straight rim thickened on the inside and outside; convex lip
5YR 6/6 reddish yellow
H 3.8; Twall 0.9; Trim 1.8; D 15
Italian Dressel 2-4 (70 BC - end 1st century AD)

88. Net*05 4062/01/2

Rim fragment of a jar
Coarse ware
Triangular rim; convex lip
Exterior 5YR 7/8 reddish yellow; interior 5YR 6/8 reddish yellow
H 2.3; Twall 0.4; Trim 1.0; D 12
Olcese, 2003: *olla* type 8 (end 1st century BC – AD 190); figure 2.9

89. Net*05 4064/01/4

Rim fragment of a jar?
Coarse ware
Overhanging convex rim, outturning into wall; convex lip
Exterior 5YR 6/6 reddish yellow; interior 5YR 5/6 yellowish red; core 5YR 6/8 reddish yellow
H 1.6; Twall 0.6; Trim 1.0; D 15

90. Net*05 4064/01/5

Handle fragment of an amphora
Coarse ware
Vertical band handle, oval in section
Exterior 5YR 6/4 light reddish brown; core 5YR 6/6 reddish yellow
H 7.4; Shandle 5.5 x 2.7
Not drawn

91. Net*05 4091/01/1

Base fragment
Coarse ware
Flat base, inside concave; flaring wall
10YR 6/4 light yellowish brown
H 3.0; Twall 0.6; Tbase 1.0; Dbase 4.5
Not drawn

92. Net*05 4093/01/3

Handle fragment
Depurated ware
Vertical band handle, on one side incised with irregular 6 lines, oval in section
7.5YR 7/4 pink
H 3.3; Shandle 1.3 x 0.6
Not drawn

93. Net*05 4105/01/1

Coarse ware
Rim fragment of a bowl
Flaring wall; slightly incurving rim, thickened on the inside; convex lip
Exterior 2.5YR 4/6 red; interior 2.5YR 5/4 reddish brown; core 2.5YR 5/8 red
H 1.6; Twall 0.4; Trim 0.5; D 11

94. Net*05 4116/01/1

Rim fragment of a bowl
African red slip ware
Flaring wall; slightly incurving rim thickened on the inside; flattened lip
Exterior/interior 10R 6/8 light red
H 2.1; Twall 0.5; Trim 0.6; D 20
Hayes, 1972: form 14b (first half 3rd century AD); figure 1.13

95. Net*05 4124/01/1

Rim fragment of a bowl
Coarse ware
Flaring wall; straight rim thickened on the inside and outside; flattened lip
Exterior 5YR 5/4 reddish brown; interior 2.5YR 4/6 red; core 2.5YR 5/8 red; lip 2.5YR 2.5/0 black
H 2.5; Twall 0.6; Trim 0.7; D 25

96. Net*05 4125/01/2

Rim fragment
Coarse ware
Outcurving rim thickened on the inside and outside; convex lip
Exterior/core 2.5YR 5/8 red; interior 2.5YR 5/6 red
H 1.1; Twall 0.5; Trim 0.7; D 20

97. Net*05 4133/01/1

Lug fragment
Impasto
Irregularly shaped lug, raised in section
5YR 6/4 light reddish yellow to 5YR 5/4 reddish brown to 5YR 3/1 very dark gray
H 3.2; Tlug 3.6
Not drawn

98. Net*05 4152/01/1

Stamped base fragment
Black glazed
Flaring base ring with a convex edge; outside base convex, inside concave with two palmette stamps; flaring wall
Glaze 2.5Y 2.5/1 black; core 10 YR 8/4 very pale brown
H 4.1; Tbase 0.6; Tbase ring 1.7; Twall 0.7; D 5.5
No exact parallel, but decoration probably 3rd - 2nd century BC

99. Net*05 4154/01/3

Rim fragment of a bowl
Impasto
Spreading wall; irregular straight rim; lip bevelled on the inside
Exterior/interior 5YR 4/3 reddish brown; core 5YR 3/1 very dark grey
H 3.2; Trim 0.9; D 20

100. Net*05 4158/01/2

Base fragment
Depurated ware
Cylindrical base ring with rounded edge
7.5YR 7/4 pink
H 2.1; Twall 0.6; Tbase 0.3; Tbase rin 1.7; Dbase 10
Not drawn

101. Net*05 4166/01/1

Rim fragment of bowl
Coarse ware
Outcurving rim; convex lip
7.5YR 7/6 reddish yellow
H 1.9; Trim 1.9; D ?

102. Net*05 4170/01/1

Spike of a small amphora
Coarse ware
Hollow cylindrical spike, lower side flattened
7.5YR 6/6 reddish yellow
H 3.3; Dspike 2.2
Not drawn

103. Net*05 4174/01/3

Rim fragment of a tile
Coarse ware
Rectangular profile with rounded internal and external angle; lip flattened
7.5YR 8/2 pinkish white
L x W 7.7 x 8.1; Hrim 4.7; Tplate 2.5
Not drawn

104. Net*05 4188/01/8

Base fragment
Coarse ware
Flaring base ring with rounded edge
2.5YR 4/6 dark red
H 3.5; Tbase ring 3.4; D 25
Not drawn

105. Net*05 4233/01/1

Rim fragment of a large basin
Coarse ware
Outturning rim, transition to wall thickened on the outside; flattened lip, slightly bevelled on the inside
10YR 8/4 very pale brown
H 3.0; Twall 2.7; D 50
Related to site 15068?

106. Net*05 4254/01/1

Rim fragment of an amphora
Coarse ware
Triangular rim; convex lip
5YR 7/6 reddish yellow
H 3.2; Twall 0.7; Trim 3.3; D 18.5
Graeco-Italic (mid 4th - mid 2nd century BC)
Related to site 15068?

107. Net*05 4254/01/2

Knob of a lid
Coarse ware
Solid cylindrical knob with slightly thickened edge; flattened on top
5YR 5/4 reddish brown
H 2.8; Dknob 4.5
Not drawn; related to site 15068?

108. Net*05 4255/01/1

Rim fragment of a tile
Coarse ware
Rectangular profile with rounded internal and external angle; lip flattened
5YR 7/4 pink
Hrim 4.5; Tplate 1.6
Not drawn; related to site 15068?

109. Net*05 4255/01/2

Coarse ware
Rim fragment of a jar/bowl
Spreading wall; straight rim thickened on the outside and undercut; convex lip
Exterior 10R 4/8 red; interior/core 5YR 4/3 reddish brown
H 1.9; Twall 0.55; Trim 1.0; D c. 20
related to site 15068?

110. Net*05 4256/01/1

Base fragment
Impasto
Flat base with thickened edge, inside flat
2.5YR 5/4 reddish brown
H 2.2; L x W 6.2 x 4.0; Twall 1.1; Tbase 1.5; D 7
Not drawn

111. Net*05 4258/01/1

Rim fragment of bowl
African red slip ware
Flaring wall; straight rim thickened on the outside with two horizontal grooves with a band of rouletting in between; convex lip
Exterior/interior 10R 5/8 red
H 2.5; Twall 0.3; Trim 0.5; D 16
Hayes, 1972: form 9a (2nd century AD); figure 1.9

112. Net*05 4262/01/1

Knob of a lid
Impasto (burnished on both sides)
Cylindrical knob with thickened edge, flattened on top
Exterior 5YR 3/4 dark reddish brown; core 5YR 3/1 very dark grey
H 3.6; Dknob 4
Not drawn

113. Net'05 4262/01/2

Rim fragment
Impasto
Spreading wall; straight rim thickened on the outside and undercut; convex lip
Exterior/core 5YR 5/6 yellowish red; interior 5YR 4/6 yellowish red
H 1.4; Twall 0.3; Trim 0.6; D 16

114. Net'05 4263/01/1

Oil lamp fragment?
Black glazed strongly curving fragment, may be a nozzle?
Glaze 2.5YR 3/0 very dark grey; core 5YR 7/4 pink
L x W 3.6 x 2.5; T 0.4

115. Net'05 4263/01/3

Base fragment
Black glazed
Cylindrical base ring with rounded edge
Glaze 2.5YR 3/0 very dark grey; core 5YR 7/4 pink
H 1.6; L x W 3.1 x 2.3; Twall 0.6; Tbase 0.6; Tbase ring 1.3; Dbase 4.5
Not drawn

116. Net'05 4265/01/1

Base fragment
Black glazed
Flaring base ring with tapering edge, outside concave
Exterior 2.5YR 6/6 light red; core 7.5YR 6/4 light brown
H 4.8; Tbase 1.0; Twall 0.9; Dbase 5.5
Not drawn

117. Net'05 4269/01/1

Rim fragment of a jar
Impasto (burnished)
Probably outcurving rim; somewhat tapering lip
Exterior 2.5YR 3/6 dark red; interior 2.5YR 4/8 red; core 2.5YR 5/6 red
H 1.7; Twall 1.1; D ?

118. Net'05 4271/01/2

Rim fragment of a bacino
Impasto (traces of burnish on both sides)
Straight rim thickened on the inside and outside; flattened lip
Exterior 5YR 4/3 reddish brown; interior/core 5YR 5/3 reddish brown
H 3.6; Twall 1.5; Trim 2.0; D >30
Related to site 15134?

119. Net'05 4275/01/1

Stamped base fragment
Black glazed
Flaring base ring, convex edge; outside base slightly convex, inside concave with three rosette stamps; flaring wall
Glaze 2.5YR 3/0 very dark grey; core 5YR 7/2 pinkish grey
H 1.5; L x W 5.3 x 4.2; Twall 0.7; Tbase 0.6; Tbase ring 1.3; D: 5.5
Bernardini, 1986: TAV.LX, stamp type 208, associated with Morel, 1981: form 2287 (1st century BC)?
Related to site 15034?

120. Net'05 4275/01/2

Knob fragment of lid
Coarse ware
Cylindrical knob, flattened on top
5YR 6/8 reddish yellow
H 2.9; Twall 0.6; Dknob 4 (but irregular)
Not drawn; related to site 15034?

121. Net'05 4275/01/3

Base fragment
Coarse ware
Flat base, inside concave
7.5YR 5/4 brown to 2.5YR 5/6 red
H 3.3; Tbase 0.6; Twall 0.9; Dbase 13
Not drawn; related to site 15034?

122. Net'05 4275/01/4

Rim fragment of jar
Coarse ware
Straight rim, flattened lip
7.5YR 6/4 light brown
H 2.6; Trim 0.9; D ?
Not drawn, sherd is very damaged; related to site 15034?

123. Net'05 4286/01/1

Rim fragment of a bowl
Black glazed
Flaring wall; straight rim; slightly tapering convex lip
Glaze 5YR 2.5/1 black; core 5YR 7/6 reddish yellow
H 2.3; Trim 0.4; D 14
Morel, 1981: series 2783/2784 (3rd - 2nd century BC)

124. Net'05 4287/01/2

Part of a clay tobacco pipe
Depurated ware
Hollow cylindrical pipe, curving towards the end; this end part is thickened
5YR 7/6 reddish yellow
L x W 4.1 x 2.8; T 2.1 - 1.3
Aylwin Cotton & Métraux, 1985: 160-161 (17th - 18th century AD)
